but as past experiences teach us the unexpected is always around the corner We cannot afford complacency as countless challenges remain including constantly emerging pathogens the rapid growth of biotechnology and the inconsistent cycles of funding for public health programs Progress can be slow but the unsung heroes in epidemiology remain focused on their missions Crisis Averted tells their stories from the eradication of smallpox in the twentieth century to a battle against mosquito borne diseases in the Florida Keys to the international safeguards implemented against extraterrestrial germs By taking a candid look at how we solve problems in public health Caitlin Rivers illuminates the role of epidemiology in all our lives and lays out the case for what can be accomplished given sufficient vision leadership and resources Crisis Averted is an inspiring and galvanizing call for us to work together towards a healthier more resilient future
