evaluation criteria developed for the guide. The criteria reflect and incorporate goals and principles of the National Science Education Standards. The annotations designate the specific content standards on which these curriculum pieces focus. In addition to the curriculum chapters, the guide contains six chapters of diverse resources that are directly relevant to middle school science. Among these is a chapter on educational software and multimedia programs, chapters on books about science and teaching, directories and guides to science trade books and periodicals for teachers and students. Another section features institutional resources. One chapter lists about 600 science centers, museums and zoos where teachers can take middle school students for interactive science experiences. Another chapter describes nearly 140 professional associations and U.S. government agencies that offer resources and assistance. Authoritative, extensive and thoroughly indexed and the only guide of its kind, *Resources for Teaching Middle School Science* will be the most used book on the shelf for science teachers, school administrators, teacher trainers, science curriculum specialists, advocates of hands-on science teaching and concerned parents.

Exploring Chemistry (Loose-Leaf) Matthew Johll, 2012-05-04

Matthew Johll's *Exploring Chemistry* covers the standard topics for the nonmajors course in the typical order but each chapter unfolds in the context of a single case study that helps students connect what they are learning to real life situations. For example, students work through the often difficult topics of molecular structure, gas laws and organic chemistry by learning about the development of powerful new chemotherapy drugs, new technologies for screening airline passengers and the creation of biodegradable biopolymers. It's the same same case driven approach that Johll uses in his acclaimed *Investigating Chemistry*, now in its Third Edition, but *Exploring Chemistry* goes beyond the other book's specific focus on examples from forensic science to use real life stories from cooking, athletics, genetics, green chemistry and more.

Criminal Investigation Michael J. Palmiotto, Michael Palmiotto, 2004

Michael Palmiotto's *Criminal Investigation* is often described as one of the most realistic and accessible texts in the study of Criminal Justice. In this Third Edition, which has been substantially updated from previous editions, Palmiotto provides greater coverage

of case screening more sources of information and in depth analyses of special investigations
