Moore, David A. Siegel, 2013-07-24 Political science and sociology increasingly rely on mathematical modeling and sophisticated data analysis and many graduate programs in these fields now require students to take a math camp or a semester long or yearlong course to acquire the necessary skills Available textbooks are written for mathematics or economics majors and fail to convey to students of political science and sociology the reasons for learning often abstract mathematical concepts A Mathematics Course for Political and Social Research fills this gap providing both a primer for math novices in the social sciences and a handy reference for seasoned researchers The book begins with the fundamental building blocks of mathematics and basic algebra then goes on to cover essential subjects such as calculus in one and more than one variable including optimization constrained optimization and implicit functions linear algebra including Markov chains and eigenvectors and probability It describes the intermediate steps most other textbooks leave out features numerous exercises throughout and grounds all concepts by illustrating their use and importance in political science and sociology Uniquely designed and ideal for students and researchers in political science and sociology Uses practical examples from political science and sociology Features Why Do I Care sections that explain why concepts are useful Includes numerous exercises Complete online solutions manual available only to professors email david.siegel@duke.edu subject line Solution Set Selected solutions available online to students Mapping the Field of Adult and Continuing Education Alan B. Knox, Simone C. O. Conceição, Larry G. Martin, 2023-07-03 Co published with The field of Adult and Continuing Education ACE has long been influential beyond its already porous borders and continues to be a source of important ideas inspiration and innovative practices for those in disciplines such as educational administration social work nursing and counseling Recognizing this the American Association for Adult and Continuing Education commissioned the editors to create this compendium which provides an invaluable resource to readers already established in the field those entering the field and to myriad neighbors of the field as well This four volume compendium also available as a combined e book brings together a host of national and international

contributors to map the field of ACE in a series of brief articles addressing key theories and practices across its many domains and settings These are arranged in four volumes available either individually or as a set Volume One Adult Learners Volume Two Teaching and Learning Volume Three Leadership and Administration Volume Four Inquiry and Influences The volume on Adult Learners will include articles addressing topics such as adult development diversity learning abilities the influence of personality on learning and the role of experience in adult learning By far the largest segment of learners in society and currently the largest segment of college students as well a better understanding of the adult learner is vital for educators of all kinds Volume two addresses Teaching and Learning topics ranging from methods and roles to programs and materials Encompassing formal and informal learning as well as the variety of focus and setting from cultural to occupational this volume explores the wide range of theory and practice in ACE Issues of Leadership and Administration such as planning and resource allocation organizational change and culture and the value of a shared vision for all stakeholders are addressed in the third volume From practical matters like staffing and volunteers to big picture issues such as alternative visions for the future of the field this volume offers vital knowledge and insight The final volume on Inquiry and Influences examines the context trends and methods of research and evaluation in the field s many domains Wide ranging inquiry has always been a hallmark of ACE and only continues to grow along with the recognition of the importance of adult learning for learners and for the society as a whole All four volumes are available as a single e book to make the most of the inter relatedness of the various topics This version uses live links in the table of contents and combined index as well as keywords at the start of each article to enable readers to follow their own topical interests and thus create unique learning pathways for themselves

Information and Software Technologies Tomas Skersys, Rimantas Butleris, Rita Butkiene, 2013-11-13 This book constitutes the refereed proceedings of the 18th International Conference on Information and Software Technologies ICIST 2012 held in Kaunas Lithuania in September 2012 The 40 revised full papers presented were carefully reviewed and selected from 81 submissions The papers are organized in topical sections on artificial intelligence and knowledge engineering business process modelling analysis and design formal analysis and design methods information and software systems engineering information technology applications and computer networks information technology in teaching and learning ontology conceptual modelling and databases requirements engineering and business rules
