Vitruvius Indra Kagis McEwen, 2004-09-17 A historical study of Vitruvius s De architectura showing that his purpose in writing the whole body of architecture was shaped by the imperial Roman project of world domination Vitruvius s De architectura is the only major work on architecture to survive from classical antiquity and until the eighteenth century it was the text to which all other architectural treatises referred While European classicists have focused on the factual truth of the text itself English speaking architects and architectural theorists have viewed it as a timeless source of valuable metaphors Departing from both perspectives Indra Kagis McEwen examines the work s meaning and significance in its own time Vitruvius dedicated De architectura to his patron Augustus Caesar the first Roman emperor whose rise to power inspired its composition near the end of the first century B C McEwen argues that the imperial project of world dominion shaped Vitruvius s purpose in writing what he calls the whole body of architecture Specifically Vitruvius s aim was to present his discipline as the means for making the emperor s body congruent with the imagined body of the world he would rule Each of the book s four chapters treats a different Vitruvian body Chapter 1 The Angelic Body deals with the book as a book in terms of contemporary events and thought particularly Stoicism and Stoic theories of language Chapter 2 The Herculean Body addresses the book s and its author s relation to Augustus whose double Vitruvius means the architect to be Chapter 3 The Body Beautiful discusses the relation of proportion and geometry to architectural beauty and the role of beauty in forging the new world order Finally Chapter 4 The Body of the King explores the nature and unprecedented extent of Augustan building programs Included is an examination of the famous statue of Augustus from Prima Porta sculpted soon after the appearance of De architectura

international relations tend to focus on abstract terms of economic interest domination rights and justice Trapped within this limited horizon the discipline fails to explain why nations of similar economic structure would have variant ideas for their foreign policies and why nations with different economic structures and ideologies could develop a similar global posture during certain periods of their histories This innovative study examines imperialism from a cultural and linguistic perspective portraying the rise and fall of ancient Greek Roman medieval Islamic modern British Russian and American empires as a part of the natural life of world civilizations As these imperial cultures matured through centuries of literary accumulation and interaction with other cultures they finally found their confidence on the world stage and transitioned from an aggressive policy towards others to a more tolerant one
