that arose following European colonisation of the Atlantic world Focusing on textiles and clothing Robert DuPlessis reveals how globally sourced goods shaped the material existence of virtually every group in the Atlantic basin during the seventeenth and eighteenth centuries *Before the Industrial Revolution* Carlo M. Cipolla,2004-08-02 First published in 1993 In this classic textbook Cipolla explores the slow but complex process of development that transformed Europe from its relatively weak position in AD 1000 into the highly dynamic and powerful society of 1700 The book is Interdisciplinary blending the economist s and the historian s approach Full of sources and commentary derived not only from social and economic history but from the history of medicine technology and ideas Substantially revised for this new edition to provide a greater wealth of illustrative material throughout the book More detailed than the previous edition in its coverage of a number of specific topics including the history of public debt the development of the monetary system the development of trade routes and production and the evolution of particular national economies The author has also added many new illustrations tables and figures *Le Pays renversé: Amérindiens et Européens en Amérique du Nord-Est 1600-1664* Denys Delâge,2011-11-01 This innovative interdisciplinary study offers a comprehensive analysis of the French Dutch and English colonization of northeastern North America during the early and middle decades of the seventeenth century It is the first book to pay serious attention to the European economic and political factors which promoted colonization and it argues that the prime determinant was the uneven development of agricultural systems in western Europe **Book Auction Records** Frank Karlslake,1909 A priced and annotated annual record of international book auctions **Book-auction Records** ,1909

That Men Would Praise the Lord Allan Tulchin,2010-07-13 That Men Would Praise the Lord breaks apart the process of mass conversion in the sixteenth century to explain why the Reformation occurred using N mes the most Protestant town in France as a case study Protestantism was overwhelmingly successful in N mes since most people converted but the process culminated in two bloody massacres of N mes s remaining Catholics Beginning in 1559 N mes went through a revolutionary period comparable to 1789 in its intensity Townspeople flocked to hear Protestant preachers and then took over Catholic churches destroyed statues and stained glass and zealously took part in the Wars of Religion which convulsed France beginning in 1562 As the Protestant movement grew it had to adapt to changing circumstances N mes s first Protestants were attracted to Calvin s theology Later converts believed that the Church needed to be cleansed of its excesses to encourage moral reform and to assist the royal treasury Iin the end many converted because of peer pressure or under duress Thus rather than argue that one factor whether religious economic or political explains the Reformation Tulchin emphasizes that the Protestant movement was the result of compromises forged among its members The conclusion extends his arguments to the rest of France That Men Would Praise the Lord marries techniques from the social sciences anthropology and cultural history in an analytic narrative resulting in a new interdisciplinary theory of the Reformation

King,2004-02-01 This is the first investigation of one of the main interests of astronomy in Islamic civilization namely timekeeping by the sun and stars and the regulation of the astronomically defined times of Muslim prayer The study is based on over 500 medieval astronomical manuscripts first identified by the author now preserved in libraries all over the world and originally from the entire Islamic world from the Maghrib to Central Asia and the Yemen The materials presented provide new insights into the early development of the prayer ritual in Islam They also call into question the popular notion that religion could not inspire serious scientific activity Only one of the hundreds of astronomical tables discussed here was known in medieval Europe which is one reason why the entire corpus has remained unknown until the present A second volume also to be published by Brill deals with astronomical instruments for timekeeping and other computing devices
