PREPPERS: HISTORY AND THE CULTURAL PHENOMENON Lynda King,2014-08-07 The word prepper seems to have burst onto the scene within the last 10 years and has increasingly become associated with fringe extremists They have been labeled by some as domestic terrorists But is prepping a new phenomenon Or is it a manifestation of a growing collective psyche that has learned from traumatic events throughout our history that preparedness is critical to human survival For new preppers who think the worst is yet to come this book offers a walk through history that shows the worst has been here before For those who wonder why so many people are concerned about being prepared this book will show that when the worst has made an appearance those who weathered it best were those who were prepared For those already familiar with history s worst who think THAT will never happen again this book offers a reminder of the Wall Street adage Past performance is no guarantee of future results For those who wonder what a prepper is this book offers a look at what they used to be and what they are today Remaking the John Francesca Davis DiPiazza,2014-08-01 Did you know that about 40 percent of the world s population lives without toilets That s more than two billion people most of whom live in rural

The Winds of History Andreas Zeman, 2023-10-24 Based on extensive archival research in six countries and intensive fieldwork the book analyzes the history of the village of Nkhlongue on the eastern Mozambican shores of Lake Malawi from the time of its formation in the 19th century to the present day The study uses Nkhlongue as a microhistorical lens to examine such diverse topics as the slave trade the spread of Islam colonization subsistence production counter insurgency decolonization civil war ecotourism and matrilineality Thereby the book attempts to reflect as much as possible on the generalizability and global comparability of local findings by framing analyses in historiographical discussions that aim to go beyond the regional or national level Although the chapters of the book deal with very different topics they are united by a common interest in the social history of rural Africa in the longue durée Contrary to persistent clichés of rural inertia in Africa the book as a whole underscores the profound changeability of social conditions and relations in Nkhlongue over the years and highlights how people's room for maneuver kept changing as a result of the Winds of History the frequent and often violent ruptures brought to the village from outside

History in the Humanities and Social Sciences Richard Bourke, Quentin Skinner, 2022-12-22 This interdisciplinary volume explores the relationship between history and a range of disciplines in the humanities and social sciences economics political science political theory international relations sociology philosophy law literature and anthropology The relevance of historical approaches within these disciplines has shifted over the centuries Many of them like law and economics originally depended on self-consciously historical procedures These included the marshalling of evidence from past experience philological techniques and source criticism Between the late nineteenth and the middle of the twentieth century the influence of new methods of research many indebted to models favoured by the natural sciences such as statistical analytical or empirical approaches secured an expanding intellectual authority while the hegemony of historical methods declined in relative terms In the aftermath of this change the essays collected in *History in the Humanities and*

Social Sciences reflect from a variety of angles on the relevance of historical concerns to representative disciplines as they are configured today

The History of Music Production Richard James Burgess, 2014 In *The History of Music Production* Richard James Burgess draws on his experience as a producer musician and author Beginning in 1860 with the first known recording of an acoustic sound and moving forward chronologically Burgess charts the highs and lows of the industry throughout the decades and concludes with a discussion on the present state of music production Throughout he tells the story of the music producer as both artist and professional including biographical sketches of key figures in the history of the industry including Fred Gaisberg Phil Spector and Dr Dre Burgess argues that while technology has defined the nature of music production the drive toward greater control over the process end result and overall artistry come from producers The result is a deeply knowledgeable book that sketches a critical path in the evolution of the field and analyzes the impact that recording and disseminative technologies have had on music production A key and handy reference book for students and scholars alike it stands as an ideal companion to Burgess's noted multi edition book *The Art of Music Production*

We Make Our Own History Laurence Cox, Alf Gunvald Nilsen, 2014-08-20 We live in the twilight of neoliberalism the ruling classes can no longer rule as before and ordinary people are no longer willing to be ruled in the old way Pursued by global elites since the 1970s neoliberalism is defined by dispossession and ever increasing inequality The refusal to continue to be ruled like this *ya basta* appears in an arc of resistance stretching from rural India to the cities of the global North From this network of movements new visions are emerging of a future beyond neoliberalism *We Make Our Own History* responds to these visions by reclaiming Marxism as a theory born from activist experience and practice This book marks a break both with established social movement theory and with those forms of Marxism which treat the practice of social movement organising as an unproblematic process It shows how movements can develop from local conflicts to global struggles how neoliberalism operates as a social movement from above and how popular struggles can create new worlds from below

Visualizing Film History Christian Gosvig Olesen, 2025-01-07 Though many archival digital objects were not born digital film archives are now becoming important resources for digital scholarship as a consequence of digitization Moreover with advancements in digital research methods involving video annotation visual analysis and GIS affecting the way we look at archival films material stylistic histories and circulation new research practices are more important than ever *Visualizing Film History* is an accessible introduction to archive based digital scholarship in film and media studies and beyond With a combined focus on the history of film historiography archiving and recent digital scholarship covering a period from the first wave of film archiving in the early 1900s to recent data art this book proposes ways to work critically with digitized archives and research methods Christian Olesen encourages a shift towards new critical practices in the field with an in depth assessment of and critical approach to doing film historiography with the latest digital tools and digitized archives Olesen argues that if students scholars and archivists are to fully realize the potential of emerging digital tools and methodologies

they must critically consider the roles that data analysis visualization interfaces and procedural human machinery interactions play in producing knowledge in current film historical research If we fail to do so we risk losing our ability to critically navigate and renew contemporary research practices and evaluate the results of digital scholarship

German Neoliberalism from 1924 to 1963 Arne I. A. Käthner, 2024-09-18 This book offers an in depth study of German neoliberalism between 1924 and 1963 arguing that a neoliberal network was established in the interwar period decades before elite networks in Great Britain and the United States fostered the neoliberal revolution of the Thatcher and Reagan administrations The author shows how this network strongly influenced societal developments in the 1950s and set a precedent for neoliberal projects in other countries This success was largely due to the deliberate and strategic reorganisation of the semantic field abandoning or reacquiring abused concepts challenging existing meanings or introducing new concepts to the political scene The book examines the Aktionsgemeinschaft Soziale Marktwirtschaft ASM an early neoliberal Think Tank founded in 1953 and led by Alexander R stow which became an influential political actor in post war West Germany The author adopts a decidedly transnational approach linking and contrasting inner German debates with those taking place transnationally among neoliberal proponents in the Mont P lerin Society More than just a political study of ideologies this book provides a historical account of the conceptual struggles over neoliberalism the actors who engaged in them the spheres in which they took place and the semantic means and conceptual strategies employed providing useful insights for scholars of German and political history as well as political science more generally
