**Official Gazette** Philippines,2004      **Women and Resistance in the Early Rastafari Movement** Daive Dunkley,2021-10-13 Winner of the Barbara T Christian Literary Award Women and Resistance in the Early Rastafari Movement is a pioneering study of women s resistance in the emergent Rastafari movement in colonial Jamaica As D A Dunkley demonstrates Rastafari women had to contend not only with the various attempts made by the government and nonmembers to suppress the movement but also with oppression and silencing from among their own ranks Dunkley examines the lives and experiences of a group of Rastafari women between the movement s inception in the 1930s and Jamaica s independence from Britain in the 1960s uncovering their sense of agency and resistance against both male domination and societal opposition to their Rastafari identity Countering many years of scholarship that privilege the stories of Rastafari men Women and Resistance in the Early Rastafari Movement reclaims the voices and narratives of early Rastafari women in the history of the Black liberation struggle      *Cooperative and Work-Integrated Education in Asia* Yasushi Tanaka,Karsten Zegwaard,2018-09-28 It has been over a century since Cooperative System of Education a work study programme for higher education was initiated by Herman Schneider at University of Cincinnati in the United States Today it is known as Cooperative Education which is commonly included within the umbrella term of Work Integrated Learning and broadly referred to by the World Association of Cooperative Education WACE as Cooperative and Work Integrated Education CWIE Its development worldwide has been closely related to the socioeconomic background of the region This book offers the first attempt to focus on the development of CWIE in Asia To date the development of CWIE in the Asia region has been slow compared to their counterparts The analysis follows international comparisons of China Japan Korea Hong Kong Vietnam Thailand Malaysia and Singapore on their educational history vocational education CWIE and future issues Although the level of development varies among them there is no doubt that this region as a whole is experiencing a rapidly growing global demographic and economic prominence CWIE can and to some extent already does play an important supportive role as part of growth The book goes on to conclude that in order to enable further successful expansion of CWIE and improve its best practice it is imperative to establish national and regional associations for CWIE as well as establish collaborative research activities across the region with governmental funding support      **Hall of Mirrors** Barry Eichengreen,2014-12-01 The two great financial crises of the past century are the Great Depression of the 1930s and the Great Recession which began in 2008 Both occurred against the backdrop of sharp credit booms dubious banking practices and a fragile and unstable global financial system When markets went into cardiac arrest in 2008 policymakers invoked the lessons of the Great Depression in attempting to avert the worst While their response prevented a financial collapse and catastrophic depression like that of the 1930s unemployment in the U S and Europe still rose to excruciating high levels Pain and suffering were widespread The question given this is why didn t policymakers do better Hall of Mirrors

Barry Eichengreen's monumental twinned history of the two crises provides the farthest reaching answer to this question to date. Alternating back and forth between the two crises and between North America and Europe, Eichengreen shows how fear of another Depression following the collapse of Lehman Brothers shaped policy responses on both continents with both positive and negative results. Since bank failures were a prominent feature of the Great Depression, policymakers moved quickly to strengthen troubled banks. But because derivatives markets were not important in the 1930s, they missed problems in the so-called shadow banking system. Having done too little to support spending in the 1930s, governments also ramped up public spending this time around. But the response was indiscriminate and quickly came back to haunt overly indebted governments, particularly in Southern Europe. Moreover, because politicians overpromised and because their measures failed to stave off a major recession, a backlash quickly developed against activist governments and central banks. Policymakers then prematurely succumbed to the temptation to return to normal policies before normal conditions had returned. The result has been a grindingly slow recovery in the United States and endless recession in Europe. *Hall of Mirrors* is both a major work of economic history and an essential exploration of how we avoided making only some of the same mistakes twice. It shows not just how the lessons of Great Depression history continue to shape society's response to contemporary economic problems but also how the experience of the Great Recession will permanently change how we think about the Great Depression.
