Hauser, 2007-03-26 Many guides claim to offer an insider view of top undergraduate programs but no publisher understands insider information like Vault and none of these guides provides the rich detail that Vault's new guide does Vault publishes the entire surveys of current students and alumni at more than 300 top undergraduate institutions Each 2 to 3 page entry is composed almost entirely of insider comments from students and alumni Through these narratives Vault provides applicants with detailed balanced perspectives *One Voice and Many* Beth Ellen Roberts, 2006 Different conceptions of the relationships between unity and multiplicity may be presented by varying the three distances inherent in dialogue poetry each of which represents a degree of differentiation the distance between the speakers the distance between the poet and the speakers and the distance between the speakers and the reader **The Textual Sublime** Hugh J. Silverman, Gary E. Aylesworth, 1990-01-05 This book addresses the question of deconstruction by asking what it is and discussing its alternatives To what extent does deconstruction derive from a philosophical stance and to what extent does it depend upon a set of strategies moves and rhetorical practices that result in criticism Special attention is given to the formulations offered by Jacques Derrida in relation to Heidegger's philosophy and by Paul de Man in relation to Kant's theory of the sublime and its implications for criticism And what in deconstructive terms does it mean to translate from one textual corpus into another Is it a matter of different theories of translation or of different practices And what of difference itself Does not difference already invoke the possibility of deconstruction's others Althusser Adorno and Deleuze are offered as exemplary cases The essays in this volume examine in detail these differences and alternatives The Textual Sublime is particularly concerned with how a text philosophical or literary sets its own limits borders and margins how it delimits what constitutes the text per se and how it invokes at the same time what is not determinately in the text The textual sublime is that aspect of a text that deconstruction shows to be both an element of the text and what surpasses the text what takes it outside itself in view of alternatives and alterities and what ties it to differing philosophical rhetorical historical and critical practices

Faden, Tom L.

Beauchamp, 1986-02-27 Clearly argued and written in nontechnical language this book provides a definitive account of informed consent It begins by presenting the analytic framework for reasoning about informed consent found in moral philosophy and law The authors then review and interpret the history of informed consent in clinical medicine research and the courts They argue that respect for autonomy has had a central role in the justification and function of informed consent requirements Then they present a theory of the nature of informed consent that is based on an appreciation of its historical roots An important contribution to a topic of current legal and ethical debate this study is accessible to everyone with a serious interest in biomedical ethics including physicians philosophers policy makers religious ethicists lawyers and psychologists This timely analysis makes a significant contribution to the debate about the rights of patients and subjects

Bibliography of the History of Medicine ,1984 **The Supplement of Reading** Tilottama Rajan,2018-03-15 No detailed description available for The Supplement of Reading **The Deconstructive Turn (Routledge Revivals)** Christopher Norris,2010 Annotation What might be the outcome for philosophy if its texts were subjected to the powerful techniques of rhetorical close reading developed by current deconstructionist literary critics When first published in 1983 Christopher Norris book was the first to explore such questions in the context of modern analytic and linguistic philosophy opening up a new and challenging dimension of inter disciplinary study and creating a fresh and productive dialogue between philosophy and literary theory Speaking of Music Keith Chapin,Andrew H. Clark,2013-07 Addresses the ways that writers musicians philosophers politicians critics and scholars speak of music from varying standpoints and in varying ways *Real and Imagined Women in British Romanticism* Gaura Shankar Narayan,2010 Real and Imagined Women in British Romanticism uses feminist ideology and deconstructive criticism to reconstruct the cultural context embedded in Romantic canonical texts To achieve this end the book undertakes a close textual study of these texts and places them in the intellectual context of Mary Wollstonecraft s critique of culture As a result of intellectual contextuallzing as well as theoretical applications the Romantic imagination as represented by William Wordsworth and John Keats emerges as the place where gender division and gender certitude break down This book intervenes in the traditional critical debates about the Romantic imagination to show that the Romantic imagination as set forth in these texts registers the vigorous cultural politics of gender and aesthetics that defined the 1790s and continued to exert influence for decades Book Jacket *Criticism, History, and Intertextuality* Richard Fleming,Michael Payne,1988 Exploring the dynamics of intertextuality this collection begins with the origins of the idea of the poem as autonomous and coherent object in American New Criticism and the relationship of that idea to the rhetoric of Brooks s Kantian sense of history Succeeding essays demonstrate the intriguing patterns of intertextuality **New Essays on My Ántonia** Sharon O'Brien,1999 A collection of essays on Willa Cather s most famous novel My Antonia Bulletin Oglethorpe University (Atlanta, Ga.),1928 **A History of Optics from Greek Antiquity to the Nineteenth Century** Olivier Darrigol,2012-01-26 This book is a long term history of optics from early Greek theories of

vision to the nineteenth century victory of the wave theory of light. It shows how light gradually became the central entity of a domain of physics that no longer referred to the functioning of the eye; it retraces the subsequent competition between medium-based and corpuscular concepts of light and it details the nineteenth-century flourishing of mechanical ether theories. The author critically exploits and sometimes completes the more specialized histories that have flourished in the past few years. The resulting synthesis brings out the actors' long-term memory, their dependence on broad cultural shifts and the evolution of disciplinary divisions and connections. Conceptual precision, textual concision and abundant illustration make the book accessible to a broad variety of readers interested in the origins of modern optics.
