**Energy Resources and Systems** Tushar K. Ghosh,Mark A. Prelas,2011-06-27 This second volume of Energy Resources and Systems is focused on renewable energy resources Renewable energy mainly comes from wind solar hydropower geothermal ocean bioenergy ethanol and hydrogen Each of these energy resources is important and growing For example high head hydroelectric energy is a well established energy resource and already contributes about 20% of the world s electricity Some countries have significant high head resources and produce the bulk of their electrical power by this method However the bulk of the world s high head hydroelectric resources have not been exploited particularly by the underdeveloped countries Low head hydroelectric is unexploited and has the potential to be a growth area Wind energy is the fastest growing of the renewable energy resources

for the electricity generation Solar energy is a popular renewable energy resource Geothermal energy is viable near volcanic areas Bioenergy and ethanol have grown in recent years primarily due to changes in public policy meant to encourage its usage Energy policies stimulated the growth of ethanol for example with the unintended side effect of rise in food prices Hydrogen has been pushed as a transportation fuel The authors want to provide a comprehensive series of texts on the interlinking of the nature of energy resources the systems that utilize them the environmental effects the socioeconomic impact the political aspects and governing policies Volume 1 on Fundamentals and Non Renewable Resources was published in 2009 It blends fundamental concepts with an understanding of the non renewable resources that dominate today s society The authors are now working on Volume 3 on nuclear advanced energy resources and nuclear batteries consists of fusion space power systems nuclear energy conversion nuclear batteries and advanced power fuel cells and energy storage Volume 4 will cover environmental effects remediation and policy Solutions to providing long term stable and economical energy is a complex problem which links social economical technical and environmental issues It is the goal of the four volume Energy Resources and Systems series to tell the whole story and provide the background required by students of energy to understand the complex nature of the problem and the importance of linking social economical technical and environmental issues

**Advances in Computers** Marvin Zelkowitz,2011-09-21 The series covers new developments in computer technology Most chapters present an overview of a current subfield within computers with many citations and often include new developments in the field by the authors of the individual chapters Topics include hardware software theoretical underpinnings of computing and novel applications of computers This current volume emphasizes architectural advances and includes five chapters on hardware development games for mobile devices such as cell phones and open source software development The book series is a valuable addition to university courses that emphasize the topics under discussion in that particular volume as well as belonging on the bookshelf of industrial practitioners who need to implement many of the technologies that are described Current information on power requirements for new processors Development of games for devices with limited screen sizes e g cellular telephones Open source software development Multicore processors

**Advances in Biomedical Sensing, Measurements, Instrumentation and Systems** Aimé Lay-Ekuakille,2009-12-24 Advances in technological devices unveil new architectures for instrumentation and improvements in measurement techniques Sensing technology related to biomedical aspects plays a key role in nowadays applications it promotes different advantages for healthcare solving difficulties for elderly persons clinical analysis microbiological characterizations etc This book intends to illustrate and to collect recent advances in biomedical measurements and sensing instrumentation not as an encyclopedia but as clever support for scientists students and researchers in order to stimulate exchange and discussions for further developments
