Textbook of Nursing Management Dr. Sudhir Kumar,Dr. Uma Kole,Mrs. Swati Kurane,Mrs. Upma Sharma,Prof. S. Sivappriyaa,2024-05-24 Administration as an activity is as old as society But it began as a field of study in 1887 with the publication of Wilson s Essay on the Study of Administration As a process administration occurs in both public and private organizations This happens in various institutions like business firms labor unions religious or charitable organizations educational institutions etc Its nature is influenced by the region to which it belongs Administration is generally divided into two types public and private administration As an aspect of government activity it has existed since the emergence of the political systems While public administration deals with the activities carried out by the government private administration refers to the management of private business enterprises The meaning is sufficiently suggestive as it emphasizes on the administrator that he should consider himself as a servant not as a master taking care doing all the work Administration is a process that affects all collective endeavours whether public or private civil or military otherwise large scale and is universal in nature It is a collective effort directed towards the achievement of consciously determined objectives Since administration pervades all planned human activities it is at the center of all human affairs Its major aspects are formulation of policy and its implementation to achieve the stated goals in the form of service or products in an optimal manner Administration is an activity that demands correct analysis and precise orientation

Instructional Design: International Perspectives II Sanne Dijkstra,Franz Schott,Norbert Seel,Robert D. Tennyson,Norbert M. Seel,2014-03-18 Instructional design theory and practice has evolved over the past 30 years from an initial narrow focus on programmed instruction to a multidimensional field of study integrating psychology technology evaluation measurement and management The growth of instructional design ID has occurred because of direct needs problems and goals from society Its application in planning instruction first developed in the United States with the Department of Defense during World War II with the purpose of meeting immediate concerns for effective training of larger numbers of military personnel From the beginning ID has rapidly expanded into applications in industrial and executive training vocational training classroom learning and professional education Although ID has its roots in the U S applications and theoretical growth is an international activity However literature at the

international level is still limited to either individual author contributions or collections primarily represented by single countries As a result there is no standard reference source that contains the rich variety of theories and applications to form the international foundation for the field The goal of this two volume set is to establish international foundations for ID theory research and practice within the framework of the two following objectives to identify and define the theoretical research and model foundations for ID and to bridge the gap between ID foundations and application Volume I includes chapters on philosophical and theoretical issues on learning theory and ID models Volume II provides an overview of the state of the art of solving ID problems The contributors offer contrasting points of view which provide a rare opportunity to see the diversity and complexity in the field The editorial committee has selected a wide range of internationally known authors to make presentations in the topic areas of the field Library of Congress Subject Headings Library of Congress,2006
