Society and Economics in Europe Savvas Katsikides, Hardy Hanappi, 2016-06-23 This book takes stock of the lessons to be learned from the experiences of different countries on their way to a transition into a unified Europe It demonstrates how the project of a unified Europe is a social pilot project that is unique in human history both with respect to the sheer number of people involved and with respect to the cultural diversity it aims to turn into a progressive advantage With no historical experience at hand the transition into a unified Europe is an exploratory process often risky but sometimes also surprisingly successful To improve the chances of establishing a successful unification it is particularly important that we learn from the mistakes

made so far and that we learn rapidly since the forces working against the pilot project of Europe will gain power very fast if the unification success slows down And as the recent developments in Greece show the vision of the final goal itself can well change during this exciting quest Apart from providing the pieces of a mosaic on which a more general theory can be built this book can be read as a collection of experiences mistakes as well as triumphs which should help the European learning process The structure of the book mirrors Europe s diversity specific country studies are combined with more general chapters and quantitatively oriented econometric work is combined with qualitatively oriented sociological studies The Structural Foundations of International Finance Padoan, P.C. Brenton, P.A. Boyd, G.,2003 The principal message of this book is that international financial enterprises must be reoriented towards funding productive activities rather than potentially destabilizing speculation The effects of financial sector operations are addressed with serious warnings that the dangers of speculative destabilization are increasing as regulatory and market discipline gradually weakens The Structural Foundations of International Finance examines the ways in which national economies especially those of industrialized countries are affected by the operations of international financial markets Although these markets provide productive funding there is also much speculative trading in stocks and currencies which can cause booms slumps and hinder recovery The authors advocate entrepreneurial coordination by productive enterprises for balanced and stable growth with reduced risks of financial crises and recessions *The Writers Directory* ,1996
