The Unchanging Truth of God? Crucial Philosophical Issues for Theology Thomas G. Guarino, 2022-02-18 It has long been a cornerstone of Catholic belief that Christians can be intelligent and creative thinkers inquisitive seekers after truth as well as men and women of ardent faith Catholics are entirely committed then to the claim that human rationality and religious faith are complementary realities since they are equally gifts of God But understanding precisely how faith and reason cohere has not always been a smooth path At times theology has allowed philosophy to become the leading and baleful partner in the faith reason relationship thereby lapsing into rationalism or relativism At other times theology has been tempted by fideism with philosophy now regarded as little more than a pernicious intruder corrupting Christian faith life and thought The essays in this volume display how Catholicism understands the proper confluence between philosophy and theology between human rationality and Christian faith between the natural order and supernatural grace To illustrate these points the book draws on a long line of Christian thinkers Origen Augustine Anselm Aquinas and in our own day Fides et Ratio of John Paul II and the Regensburg Address of Benedict XVI How is theology always a Jewgreek enterprise to borrow a term from Jacques Derrida always a combination of the biblical Hebraic and philosophical Hellenic traditions Why is one particular element of philosophy metaphysics essential for the intelligibility and clarity of Catholic theology Why is this so much the case that John Paul II could state emphatically a philosophy which shuns metaphysics would be radically unsuited to the task of mediation in the understanding of Revelation But theology cannot simply be about dialogue with philosophers of yesteryear Theology must constantly incorporate fresh thinking and remain in lively conversation with an extensive variety of contemporary perspectives This book displays how reciprocity and absorption has been characteristic of theology's past and must represent its future as well

Ratio et Fides Robert E. Wood, 2018-10-09 In the face of growing skepticism and relativism believe in reason is the central message in Pope John Paul II's Fides et Ratio Only by the two wings of reason and faith together can the human spirit soar The current work Ratio et Fides is its philosophical counterpart It is not a watered down introduction but a leading into the heart of philosophic thinking Firmly rooted in the phenomenological description of an ordinary artifact a mailbox the book uses the principles involved in the description to examine key figures in the history of thought We focus on three areas the Soul Morality and God We consider seven thinkers Plato and Aristotle who founded the tradition were taken up by Augustine and Aquinas in developing their theologies Descartes launched the distinctively modern tradition culminating in Hegel's systematic presentation of the whole Western tradition philosophical and religious More recently Heidegger approached that tradition in terms of its hidden ground in the Mystery of Being recalling us to meditative thinking as the secular counterpart to prayer Armed with this background students will be able to approach with profit the Fathers of the Church and major theologians and philosophers past and recent

Illuminating Faith Francesca Aran Murphy, Balázs M. Mezei, Kenneth Oakes, 2015-01-29 This textbook will give students a clear understanding of the connection between faith and reason

Illuminating Faith gives students a clear and accessible introduction to some of the major ways faith and the relationship between faith and reason have been understood within Western Christianity. In twenty six short and easy to digest units it covers different accounts of faith beginning with Scripture moving through the history of Christian thought and ending with contemporary views. Along the way it explores some of the decisive theological and philosophy accounts of faith such as faith seeking understanding, faith and supernatural virtue, faith and skepticism and faith and science. Yet it also includes significant issues and movements not typically covered in introductory texts such as documents from church councils, faith as knowledge, assent and trust in the Protestant scholastics, faith and the heart in pietism, secularized accounts of faith, faith after Auschwitz and faith and liberation. The goal of each unit is to introduce students to topical issues surrounding the nature of faith, to provide historical background for each topic and to generate further discussion and reflection on the nature of faith. The result is a well balanced and unique introduction to various understandings of faith. Designed specifically with classroom use in mind, Illuminating Faith includes a glossary of words, an update to date bibliography and each chapter ends with questions for discussion as well as suggestions for relevant reading material.
