**Advancing the forest and water nexus** Food and Agriculture Organization of the United Nations, 2019-10-18 Forests are intrinsically linked to water forested watersheds provide 75 percent of our accessible freshwater resources Millennium Ecosystem Assessment 2005 and both forest and water resources are relevant to the achievement of all 17 Sustainable Development Goals Despite the important interlinkages the forest-water nexus is often unaccounted for in policy and planning For example three quarters of forests are not managed for

soil and water conservation which poses a fundamental challenge to achieving sustainable and resilient communities and ecosystems It is paramount to employ an integrated approach to forest and water resources in management and policy that takes into account the complexity and contextual nature of forest water relationships To achieve this we must improve our understanding of forest water relationships within local contexts and at different scales as well as our ability to design implement and learn from landscape approaches that both rely on these forest water relationships and impact them In this context FAO s Forest and Water Programme has developed a module based capacity development facilitation guide for project and community stakeholders involved in forest water and natural resource management to ensure we apply our knowledge to better manage forests and trees for their multiple benefits including water quantity quality and the associated socio economic benefits that people within and outside forests so heavily depend on

*Operational templates and guidance for EMS mass incident deployment*, *Cases on Informal Learning for Science and Mathematics Education* Sun, Li, Lin, Cheng-Yao, 2025-04-17. Many educators face the challenge of engaging students in science and mathematics, often struggling to bridge the gap between theoretical concepts taught in classrooms and their real-world applications. This disconnect can lead to disinterest and disengagement among students, hindering their learning outcomes. *Cases on Informal Learning for Science and Mathematics Education* offers a solution to this problem by showcasing how informal learning experiences can significantly enhance students' understanding and engagement in these subjects. This book demonstrates the potential of informal learning to support and complement formal classroom instruction by presenting a rich collection of case studies. It highlights how activities such as cooking, budgeting, visiting museums, and participating in after-school math clubs can serve as valuable informal learning experiences that deepen students' understanding of science and mathematics concepts. The book also addresses the challenge of recognizing the value of informal knowledge in problem-solving, offering insights and strategies for educators to help students leverage their informal learning experiences.

*Folklife Center News*, 1999. **WILDFIRE AND COMMUNITY** Douglas Paton, Fantina Tedim, 2012. Wildfires represent a growing threat to environments, to people, communities, and to societies worldwide, particularly in the United States, Southern Europe, and Australia. Recognition of this growing risk has highlighted a

need to develop people's capacity to adapt to annually occurring events that could increase in frequency and severity over the coming years and decades. The goal of ensuring sustained levels of protective measures in communities susceptible to wildfire hazard consequences has proved to be elusive. This book examines why this is so and identifies ways in which sustained levels of preparedness can be facilitated. Major topics include wildfire preparedness and resiliency in community contexts; socially disastrous landscape fires in southeastern Australia; landscape typology of residential wildfire risk; proactive human response to wildfires; outbreak forest fires in wildland urban interface; wildfire risk management; stay or go policy in the line of fire; social dimensions of forest fire; the influence of community diversity; evaluating a community engagement initiative; response to fire threats; social media and resiliency; and building on lessons learned. Additional information includes the landscape fires in southeastern Australia; wildfire risk management in Portugal; fire preparedness in Greece, Cyprus, and the Pine Barrens in the northeastern United States. The findings of research programs being conducted in the United States, Australia, Europe, India, and South America are presented. The book includes case studies on the analysis and proposed actions of the wildland urban interface being faced by Central Chile and South America. This book will provide a comprehensive and systematic review of the wildfire preparedness research and its application to the development of risk communications and public education programs.
