At the firm level it elucidates the strategic goals served by IHRM and the processes used to achieve them. At the individual level the analysis extends beyond the traditional focus on expatriates to encompass the various IHRM actors and their motivations. Each chapter features a case study, a media article, tutorial activities, discussion questions and links to further reading. The book concludes with three extended case studies, each based on a specific region to help students consolidate their understanding. *South African Human Resource Management* Ben Swanepoel, 2003 South African Human Resource Management focuses on the knowledge and skills that managers at all levels need. Stone, James H. Dulebohn, 2016-10-01 This volume of the series Research in Human Resource Management HRM focuses on a number of important issues in HRM and OB including performance appraisal, political skill, gratitude, psychological contracts, the philosophical underpinnings of HRM, pay and compensation, messages and electronic human resource management. For example, the first article by Cleveland and Murphy considers a very controversial issue, i.e. the reasons that organizations are abandoning the use of performance appraisal. The next article by Harris, Ferris, Summers and Munyon is extremely interesting and focuses on how composite political skills, e.g. social astuteness, interpersonal influence, helps individuals develop productive work relationships in organizations. The third article by Scandura and Sharif presents a very innovative model of gratitude in organizations and the authors argue that gratitude is essential for maintaining positive social relations in organizations. The fourth article by Suazo and Stone Romero provides an extremely comprehensive review of the theory and research on psychological contracts in organizations from 1960 to 2015. The subsequent article by Bae, Kang and Kim presents a very unique perspective on HRM and considers the philosophical underpinnings of the field. The sixth article by Murray, Dulebohn, Roehling and Werling presents a very innovative model to explain the role that organizational messages about changes in pay or compensation systems have on anticipatory pay satisfaction. The final article in the series by Johnson, Thatcher and Bureson presents a thought provoking framework for understanding the key role that information technology (IT) plays in the field of HRM. The series should be useful to researchers and doctoral students in the fields of HRM, OB and Industrial and Organizational Psychology. It should also be relevant for doctoral courses and scientist practitioners in these fields. **Human Resource Management** R. C.
