Criner, Gilbert E. D'Alonzo, 2013-03-09 Critical care medicine is a dynamic and exciting arena where complex
pathophysiologic states requiring extensive knowledge and clinical acumen are commonly found Caring for critically ill
patients requires an extensive knowledge of basic pathophysiology as well as awareness of the appropriate diagnostic tests
and therapeutic interventions Because this knowledge base crosses many different disciplines introduction to caring for the
intensive care patient while exciting may also be intimidating This textbook is designed toward making the dynamic
environment of the critical care unit understandable and the approach to the patient both logical and successful The book
contains three components 1 description of the procedural tasks commonly performed for the critically ill patient 2
explanation of the most common pathophysiologic states encountered and 3 description of specific disease entities with
details of their differential diagnosis diagnostic strategy and therapeutic plan This book also uses several educational
approaches that we have found useful in our own teaching sessions and prior textbooks Clinical cases introduce chapters and
highlight chapter segments to emphasize clinical relevancy As an additional study aid margin notes highlight important
teaching points and facilitate easy review of chapter content To consolidate the principles outlined in each chapter review
questions with full text explanations are provided at the end of each chapter All these elements help reinforce the most
important messages for the reader **UPSC Prelims Exam 2024 (Paper-I) : General Science | Topic-wise Study
