Date:

Name:

---

### Title

A whole page for a title is unnecessary and quite wasteful of paper. Put the title of your lab experiment at the top. Include your name, your group members' names, teacher's name, course and the date.

### Purpose

Answer in a sentence or two, "what is the purpose of this experiment?"

### Question

Write down a testable question, e.g. "How does string length affect the period of a pendulum?" or "What is the acceleration due to gravity in my school?" The general format is "how does *independent variable* affect *dependent variable*?"

### Hypothesis

Use the format "If...then...because". E.g. "If the length of the string increases, then the period of the pendulum will increase because the object has to travel farther".

### Experimental Design

What are you going to do in the experiment? Explain briefly, in a few sentences, what is the generalized procedure. State the independent, dependent and controlled variables.

### Materials

List any and all materials you will need for the experiment (NOT the materials you needed to build your launcher). Use the proper name and include the number if you need multiples.

### Scientific Drawing

Include a one-page scientific drawing of your apparatus that includes your projectile launcher, measuring devices, etc.

### Safety

minority success in Canada The stance of this book is that new immigrants refugees and international students do not have to settle for underachievement despite the cultural and structural disadvantages they face in Canada The fact is the unequal social structure of Canada has some cracks and many minorities have used strategic resources to open up these cracks and achieved tremendous upward social mobility in Canadian society from the margins These documented minority successes in Canada in the face of systemic marginalization provide lessons and hope for new immigrants refugees and international students The economic political social and cultural problems that minorities encounter in Canadian institutions organizations communities and from individuals overwhelm and break many of them However some minorities break records in the face of the frustrations they encounter What accounts for the success of the latter group of immigrants refugees and international students in Canada Individual efforts and personal ambitions are not enough to explain these success stories This book highlights strategies and support systems that facilitate minority strategic connections with Canadian mainstream institutions organizations and individuals to win from the margins of society Although the book does not get into the theories of inequality equity and diversity it does acknowledge the structural and cultural barriers to minority success in Canada That is it does not blame individual minorities for not making it in Canada Rather it points to strategic resources that new immigrants refugees and international students can use to help them overcome some of the barriers to success in Canada
