ECOOP 2005 - Object-Oriented Programming Andrew Black, 2005-07-18 The 19th Annual Meeting of the European Conference on Object Oriented Programming ECOOP 2005 took place during the last week of July in Glasgow Scotland UK This volume includes the refereed technical papers presented at the conference and two invited papers It is traditional to preface a volume of proceedings such as this with a note that emphasizes the importance of the conference in its respective field Although such self evaluations should always be taken with a large grain of salt ECOOP is undisputedly the pre eminent conference on object orientation outside of the United States In its turn object orientation is today s principal technology not only for programming but also for design analysis and specification of software systems As a consequence ECOOP has expanded far beyond its roots in programming to encompass all of these areas of research which is why ECOOP has remained such an interesting conference But ECOOP is more than an interesting conference It is the nucleus of a technical and academic community a community whose goals are the creation and dissemination of new knowledge Chance meetings at ECOOP have helped to spawn collaborations that span the boundaries of our many subdisciplines bring together researchers and practitioners cross cultures and reach from one side of the world to the other The ubiquity of fast electronic communication has made maintaining these collaborations easier than we would have believed possible only a dozen years ago But the role of conferences like ECOOP in establishing collaborations has not diminished
