

2.1 General Safety Guidelines

Standard operating procedures must be readily available to all laboratory employees. The following guidelines have been established to minimize or eliminate hazards in the laboratory. These guidelines have also been provided to maintain a safe laboratory environment. It is the responsibility of each person that enters into the laboratory to understand the safety and health hazards associated with potential hazardous materials and equipment in the laboratory. It is also the individual's responsibility to practice the following general safety guidelines at all times:

1. Always wear proper eye protection in chemical work, handling and storage areas. Contact lenses should normally not be worn. Fitted goggles are essential if, for therapeutic reason, contact lenses must be worn.
2. Always know the hazards associated with the materials that are being utilized in the lab.
3. Always wear appropriate protective clothing. Cover shorts, cutoffs or miniskirts with a suitable lab coat or apron.
4. Confine long hair and loose clothing. Do not wear high-heeled shoes, open-toed shoes, sandals or shoes made of woven material.
5. Always wash hands and arms with soap and water before leaving the work area. This applies even if you have been wearing gloves.
6. Never perform any hazardous work when alone in the laboratory. At least two people should be present. Undergraduate students must be supervised by an instructor at all times.
7. Never perform unauthorized work, preparations or experiments.
8. Never engage in horseplay, pranks or other acts of mischief in chemical or biological work areas.
9. Never remove chemicals, biological agents, or radioactive materials from the facility without proper authorization.
10. Be familiar with the location of emergency equipment - fire alarm, fire extinguisher, emergency eye wash and safety shower. Know the appropriate emergency response procedures.
