Uganda Jörg Wiegratz, Giuliano

Martiniello, Elisa Greco, 2018-11-15 For the last three decades Uganda has been one of the fastest growing economies in Africa Globally praised as an African success story and heavily backed by international financial institutions development agencies and bilateral donors the country has become an exemplar of economic and political reform for those who espouse a neoliberal model of development The neoliberal policies and the resulting restructuring of the country have been accompanied by narratives of progress prosperity and modernisation and justified in the name of development But this self celebratory narrative which is critiqued by many in Uganda masks the disruptive social impact of these reforms and silences the complex and persistent crises resulting from neoliberal transformation Bringing together a range of leading scholars on the country this collection represents a timely contribution to the debate around the New Uganda one which confronts the often sanitised and largely depoliticised accounts of the Museveni government and its proponents Harnessing a wealth of empirical materials the contributors offer a critical multi disciplinary analysis of the unprecedented political socio economic cultural and ecological transformations brought about by neoliberal capitalist restructuring since the 1980s The result is the most comprehensive collective study to date of a neoliberal market society in contemporary Africa offering crucial insights for other countries in the Global South Uganda: a primary health care case study in the context of the COVID-19 pandemic

Rhona MIJUMBI-DEVE, Ismael KAWOOYA, Edward KAYONGO, 2024-05-29 This case study examines country level primary health care PHC systems in Uganda The case study is part of a collection of case studies providing critical insights into key PHC strengths challenges and lessons learned using the Astana PHC framework which considers integrated health services multisectoral policy and action and people and communities Led by in country research teams the case studies update and extend the Primary Health Care Systems PRIMASYS case studies commissioned by the Alliance in 2015

**Universities and Economic Development in Africa** Nico Cloete, Tracy Bailey, Peter A. M. Maassen, 2011 Universities and economic development in Africa Pact academic core and coordination draws together evidence and synthesises the findings from eight African case studies The three key findings presented in this report are as follows 1 There is a lack of clarity and agreement pact about a development model and the role of higher education in development at both national and institutional levels There is however an increasing awareness particularly at government level of the importance of universities in the global context of the knowledge economy 2 Research production at the eight African universities is not strong enough to enable them to build on their traditional undergraduate teaching roles and make a sustained contribution to development via new knowledge production A number of universities have manageable student staff ratios and adequately qualified staff but inadequate funds for staff to engage in research In addition the incentive regimes do not support knowledge production 3 In none of the countries in the sample is there a coordinated effort between government external stakeholders and the university to systematically strengthen the contribution that the university can make to development While at each of the universities there are exemplary development projects that connect strongly to external stakeholders

and strengthen the academic core the challenge is how to increase the number of these projects The project on which this report is based forms part of a larger study on Higher Education and Economic Development in Africa undertaken by the Higher Education Research and Advocacy Network in Africa HERANA HERANA is coordinated by the Centre for Higher Education Transformation in South Africa Annual Report Uganda Human Rights Commission,2016 **The National Council for Higher Education and the Growth of the University Sub-sector in Uganda, 20022012** A.B.K.

Kasozi,2016-12-29 The National Council for Higher Education NCHE and the Growth of the University Sub sector in Uganda 2002 2012 narrates the experience of the Ugandan NCHE in the establishment development and regulation of higher education institutions in Uganda from 2002 to 2012 In this period student numbers in higher education institutions increased from about 65 000 to some 200 000 and university institutions from about ten to more than triple the number The book discusses the role of a regulatory agency in the delivery of higher education the relations of universities and colleges with such an agency its impact on developing university capacities and leadership in creating and refining higher education ideas The experience of Ugandas regulatory agency the NCHE in those ten years should help both the Ugandan and other African countries higher education stakeholders in sharing lessons learned from this one case study The author sees the roles of regulatory agencies as vital in the initial stages of building a higher education sub sector and in periods of system transitions such as the current journey from elite to mass systems but is of the view that the university remains the home of knowledge creation dissemination and its application in society **Artificial Intelligence (AI) and Finance** Bahaaeddin A. M.

Alareeni,Islam Elgedawy,2023-08-26 Artificial intelligence AI has the potential to significantly improve efficiency reduce costs and increase the speed and accuracy of financial decision making making it an increasingly important tool for financial professionals One way that AI can improve efficiency in finance is by automating tasks and processes that are time consuming and repetitive for humans For example AI algorithms can be used to analyze and process large amounts of data such as financial statements and market data in a fraction of the time that it would take a human to do so This can allow financial professionals to focus on higher value tasks such as interpreting data and making strategic decisions rather than being bogged down by mundane tasks AI can also reduce costs in finance by increasing automation and eliminating the need for certain tasks to be performed manually This can result in cost savings for financial institutions which can then be passed on to customers in the form of lower fees or better services AI can be used to identify unusual patterns of activity that may indicate fraudulent behavior This can help financial institutions reduce losses from fraud and improve customer security AI powered chatbots and virtual assistants can help financial institutions provide faster more efficient customer service particularly when it comes to answering common questions and handling routine tasks Some financial institutions are using AI to analyze market data and make trades in real time AI powered trading algorithms can potentially make faster and more accurate trading decisions than humans In terms of speed and accuracy AI algorithms can analyze data and make decisions

much faster than humans and can do so with a high degree of accuracy This can be particularly useful in fast moving financial markets where quick and accurate decision making can be the difference between success and failure This book highlights how AI in finance can improve efficiency reduce costs and increase the speed and accuracy of financial decision making Moreover the book also focuses on how to ensure the responsible and ethical use of AI in finance This book is a valuable resource for students scholars academicians researchers professionals executives government agencies and policymakers interested in exploring the role of artificial intelligence AI in finance Its goal is to provide a comprehensive overview of the latest research and knowledge in this area and to stimulate further inquiry and exploration     Widening University Access and Participation in the Global South Edward Mboyonga,2024-12-31 Using a capability approach as an analytical framework this timely volume examines how access to higher education enabled through private universities can transform students lives and contribute to human development in low income countries in the Global South Providing new insights into the contribution of the private higher education sector in Africa s developmental agendas the book offers an alternative to human capital theory by offering an expansive notion on the value of higher education emphasising both the economic and the intrinsic societal and social benefits that come from access to university and raised aspirations The chapters identify and discuss six specific capabilities valued by students that higher education provides This includes epistemological access epistemic contribution aspiration recognition respect and belonging Ubuntu and employability The book foregrounds the voices of students and lecturers to explore students aspirations agency access and participation Ultimately promoting a reconsideration of access to higher education beyond numerical terms by focusing on students access to transformative knowledge as means to promote their freedom to achieve well being the book will appeal to scholars researchers and postgraduate students in higher education African education studies and international and comparative education more broadly     *Capital Penetration and the Peasantry in Southern and Eastern Africa* Freedom Mazwi,George Tonderai Mudimu,Kirk Helliker,2022-02-12 This book examines the impact of neoliberalism on peasant agriculture as a key livelihood strategy in Southern and Eastern Africa against the background of the current development crisis and the crossroads that Southern and Eastern Africa faces It systematically analyses how the neoliberal architecture has deepened extroverted production for capitalist accumulation and how this has been to the detriment of the rural labour force and small scale and communal landowners Apart from examining how neoliberalism has triggered land alienations the book further argues that such policies have also impacted negatively on food security in a number of ways The book presents empirical evidence through twelve case studies emerging from in depth original fieldwork carried out in seven countries in the Southern and Eastern African region This book is a must read for scholars of economics sociology anthropology history agrarian studies and political science as well as practitioners and policy makers interested in a better understanding of the impact of the agrarian neoliberal restructuring on the peasantry in Southern Africa     Kenyan Public Universities in the Age

of Internationalization Iddah Aoko Otieno, 2018-06-20 This book presents a comprehensive institutional level analysis of a single public institution of higher education in the Republic of Kenya using the case study method of investigation It is the first case study to use both qualitative and quantitative research methodology to illuminate the experiences of Kenyan public universities with internationalization post independence Focusing on Kenya's oldest national public university the University of Nairobi's experimentation with internationalization Kenyan Public Universities in the Age of Internationalization is a first in the East African region The book argues that attempts by institutions of higher education in Africa to engage in internationalization with the much more older and well established IHEs in the developed world has perpetuated the colonial legacy that has relegated these institutions to the position of the Other in the new international order Several policy implications are offered on what it means to participate in internationalization from a marginal peripheral position The conventional assumption that political independence would bring to most African countries and by extension their national public universities a period of freedom from political economic and cultural subjugation and exploitation by the more powerful world nations has proved elusive This book is intended for a broad audience in the field of Comparative International Education The mixed research methods used in this book will certainly appeal to instructors students and general readers interested in understanding the experiences of historically marginalized developing World institutions of higher education with internationalization

**African Studies: Breakthroughs in Research and Practice** Management Association, Information Resources, 2020-04-03 Global interest in African studies has been rapidly growing as researchers realize the importance of understanding the impact African communities can have on the economy development education and more As the use acceptance and popularity of African knowledge increases it is crucial to explore how this community based knowledge provides deeper insights understanding and influence on such things as decision making and problem solving African Studies Breakthroughs in Research and Practice examines the politics culture language history socio economic development methodologies and contemporary experiences of African peoples from around the world Highlighting a range of topics such as indigenous knowledge developing countries and public administration this publication is an ideal reference source for sociologists policymakers anthropologists government officials economists instructors researchers academicians and graduate level students in a variety of fields

**Higher Education Transformation in Africa** Emnet Tadesse Woldegiorgis, Logan Govender, Dennis Zami Atibuni, 2024-11-05 This book critically interrogates the notion of transformation in higher education focusing on epistemological and structural issues in postcolonial and contemporary Africa The book considers the multifaceted challenges facing higher education in the continent and uses the concept of transformation as a common thread weaving through a range of issues including epistemology identity relevance research collaboration and decoloniality Arguing for a holistic approach towards progressive and innovative education systems the book calls for a fundamental transformation that expands access enhances quality and competitiveness addresses past

injustices and improves the capacity to act together for a more sustainable and just future Overall the book makes a powerful case for the power of transformation in higher education to shape the social economic and cultural fabric of society This book s critical evaluation of knowledge production in Africa will be an important read for researchers and policymakers involved in Africa s higher education sector

**Access, Quality, and the Global Learning Crisis** Sarah Kabay,2021-08-26 Around the world 250 million children cannot read write or perform basic mathematics They represent almost 40% of all primary school aged children This situation has come to be called the global learning crisis and it is one of the most critical challenges facing the world today Work to address this situation depends on how it is understood Typically the global learning crisis and efforts to improve primary education are defined in relation to two terms access and quality This book is focused on the connection between them Through a mixed methods case study it provides detailed contextualized analysis of Ugandan primary education As one of the first countries in Sub Saharan Africa to enact dramatic and far reaching primary education policy Uganda serves as a compelling case study With both quantitative and qualitative data from over 400 Ugandan schools and communities the book analyzes grade repetition private primary schools and school fees viewing each issue as an illustration of the connection between access to education and education quality This analysis finds evidence of a positive association challenging a key assumption that there is a trade off or disconnect between efforts to improve access to education and efforts to improve education quality Embracing the complexity of education systems and focusing on dynamics where improvements in access and quality can be mutually reinforcing can be a new approach for improving basic education in different contexts around the world
