### How is a PCB Fabricated

#### Prerequisites for PCB Fabrication

Before you can even start discussing with a fabricator regarding the PCB for your project, there are some prerequisites that you need to take into consideration. The first among these involves figuring out the amount of space available within your project, where you can position the PCB conveniently. This is easy if you have already completed the groundwork for the design of the project, as the designer would have already visualized the space available for the PCB. If this is not the case, you are free to define the size of the board, and finalize the shape and size of your project accordingly.

The next prerequisite is a proper circuit diagram or schematic of the electronics your project will be using. This is a visual depiction of the various components necessary and the manner they need to be interconnected for achieving proper functionality. Although this can be a paper diagram, it is more useful to employ a computer software program for the purpose, as such programs also help in the subsequent steps necessary to fabricate the PCB.

Moreover such computer software programs, also known as **ECAD** softwares, are available. Some of them are free to use, while you have to pay to own and use the others. Whether free or paid, **ECAD** softwares typically come with a library of commonly used mechanical and
