**Environments of Intelligence** Hajo Greif, 2017-09-01 What is the role of the environment and of the information it provides in cognition More specifically may there be a role for certain artefacts to play in this context These are questions that motivate 4E theories of cognition as being embodied embedded extended enactive In his take on that family of views Hajo Greif first defends and refines a concept of information as primarily natural environmentally embedded in character which had been eclipsed by information processing views of cognition He continues with an inquiry into the cognitive bearing of some artefacts that are sometimes referred to as intelligent environments Without necessarily having much to do with Artificial Intelligence such artefacts may ultimately modify our informational environments With respect to human cognition the most notable effect of digital computers is not that they might be able or become able to think but that they alter the way we perceive think and act The Open Access version of this book available at <http://www.tandfebooks.com/doi/view/10.4324/9781315401867> has been made available under a Creative Commons CC BY licence

*Evolution* Edward J. Larson, 2006-08-08 I often said before starting that I had no doubt I should frequently repent of the whole undertaking So wrote Charles Darwin aboard The Beagle bound for the Galapagos Islands and what would arguably become the greatest and most controversial discovery in scientific history But the theory of evolution did not spring full blown from the head of Darwin Since the dawn of humanity priests philosophers and scientists have debated the origin and development of life on earth and with modern science that debate shifted into high gear In this lively deeply erudite work Pulitzer Prize winning science historian Edward J Larson takes us on a guided tour of Darwin's dangerous idea from its theoretical antecedents in the early nineteenth century to the brilliant breakthroughs of Darwin and Wallace to Watson and Crick's stunning discovery of the DNA double helix and to the triumphant neo Darwinian synthesis and rising sociobiology today Along the way Larson expertly places the scientific upheaval of evolution in cultural perspective the social and philosophical earthquake that was the French Revolution the development in England of a laissez faire capitalism in tune with a Darwinian ethos of survival of the fittest the emergence of Social Darwinism and the dark science of eugenics against a backdrop of industrial revolution the American Christian backlash against evolutionism that culminated in the famous Scopes trial and on to today's world where religious fundamentalists litigate for the right to teach creation science alongside evolution in U S public schools even as the theory itself continues to evolve in new and surprising directions Throughout Larson trains his spotlight on the lives and careers of the scientists explorers and eccentrics whose collaborations and competitions have driven the theory of evolution forward Here are portraits of Cuvier Lamarck Darwin Wallace Haeckel Galton Huxley Mendel Morgan Fisher Dobzhansky Watson and Crick W D Hamilton E O Wilson and many others Celebrated as one of mankind's crowning scientific achievements and reviled as a threat to our deepest values the theory of evolution has utterly transformed our view of life religion origins and the theory itself and remains controversial especially in the
