

CASE STUDY TEMPLATE

What is a case study?

A case study is an individual's story. It tells the reader how Save the Children's work has made a difference in the life of a child or his/her family.

1. Background: Please provide basic information about the interviewee(s).

Name(s), gender, age:	Mama Amina a Female aged 25 years
Location – village/town, district/province and country:	Mama Amina is a resident of Arbanqeramso location of wajir east constituency in Wajir County Northern Kenya.
Keywords – themes:	BEHAVIOUR CHANGE COMMUNICATION

2. Summary: Please describe the interviewee's day-to-day life and environment.

Amina hails from a very insolvent family which has put them in an abject situation and the kind of life they are living can't be compared to that of their neighbours since they never owned a source of wealth. She came to settle in Arbaqheramso in 2011 during the prolonged Horn of Africa drought that swept away their livestock. Her husband is a small scale herder and most of the time is absent from home looking after other people's shoats. They live in a small makeshift home.

3. The story: Interviewee's story in his or her own words. Please use exact words with direct quotes.

Amina who is a mother of two boys and one girl, is among the beneficiaries of the County Department of Health (CDH) and Save the Children Health and Nutrition integrated interventions as well as a member of a Mother to Mother Support Group (MTMSG) who has attended several health and nutrition promotion sessions and short trainings such as Participatory Hygiene and sanitation transformation (PHAST), Community Led Total sanitation (CLTS) and others that stimulated her mind to realize the importance of hygiene and sanitation as a preventive measure. She said, "I have been part of the communities triggered by Sub-County public health officers together with Save the Children staff and I feel that there is need to change." She said, "Our source of water is a shallow well and when it rains it usually floods and fills with water to the brim. However, we have been consuming the water without boiling thus our children and us becomes sick due to unhygienic conditions. My gratitude goes to Save the Children and the Health Department who have used their time and resources to empower us at the grass root level." Immediately after CLTS triggering in October 2014, Amina started to construct a pit latrine in her compound as she vowed never to go back to open defecation. On the completion of the latrine Amina welcomed her neighbours to share with her with no string attached to it but exhort them to construct one to elude slavery and advocate for Open Defaecation Free environment (ODF).

"Hooran kathitha ayaan isku ceelin jiray muusqull laan awgeed ,gumeerka ayaana eehanunu jiray waxana kacabsan jiray cuuthur kathitha xageed inn uu igudacaa lakkiin xada waan reystay maarkan musqushi distaay" Amina retorts. ("Used to retain urine in my bladder for long hours due to lack of toilet and I had put myself in the risk of getting Urinary Tract Infections(UTIs) but now I am relieved since I own a personal latrine" she also said that *'Niin cessantisa ayaa ceelgeysa'*" It is only your belongings that can quench your thirst")

Beyond open access: visions for open evaluation of scientific papers by post-publication peer review Nikolaus Kriegeskorte,Diana Deca, A scientific publication system needs to provide two basic services access and evaluation The traditional publication system restricts the access to papers by requiring payment and it restricts the evaluation of papers by relying on just 2 4 pre publication peer reviews and by keeping the reviews secret As a result the current system suffers from a lack of quality and transparency of the peer review evaluation process and the only immediately available indication of a new paper s quality is the prestige of the journal it appeared in Open access is now widely accepted as desirable and is slowly beginning to become a reality However the second essential element evaluation has received less attention Open evaluation an ongoing post publication process of transparent peer review and rating of papers promises to address the problems of the current system However it is unclear how exactly such a system should be designed The evaluation system steers the attention of the scientific community and thus the very course of science For better or worse the most visible papers determine the direction of each field and guide funding and public policy decisions Evaluation therefore is at the heart of the entire endeavor of science As the number of scientific publications explodes evaluation and selection will only gain importance A grand challenge of our time therefore is to design the future system by which we evaluate papers and decide which ones deserve broad attention So far scientists have left the design of the evaluation process to journals and publishing companies However

the steering mechanism of science should be designed by scientists The cognitive computational and brain sciences are best prepared to take on this task which will involve social and psychological considerations software design and modeling of the network of scientific papers and their interrelationships This Research Topic in Frontiers in Computational Neuroscience collects visions for a future system of open evaluation Because critical arguments about the current system about these papers will focus on constructive ideas and comprehensive designs for open evaluation systems Design decisions include Should the reviews and ratings be entirely transparent or should some aspects be kept secret Should other information such as paper downloads be included in the evaluation How can scientific objectivity be strengthened and political motivations weakened in the future system Should the system include signed and authenticated reviews and ratings Should the evaluation be an ongoing process such that promising papers are more deeply evaluated How can we bring science and statistics to the evaluation process e g should rating averages come with error bars How should the evaluative information about each paper e g peer ratings be combined to prioritize the literature Should different individuals and organizations be able to define their own evaluation formulae e g weighting ratings according to different criteria How can we efficiently transition toward the future system Ideally the future system will derive its authority from a scientific literature on community based open evaluation We hope that these papers will provide a starting point

The Case Study as Research Method Yves-Chantal Gagnon, 2011-01-27T00:00:00-05:00 The main advantages of case research are that it can produce an in depth analysis of phenomena in context support the development of

historical perspectives and guarantee high internal validity which is to say that the observed phenomena are authentic representations of reality In short the case study is adaptable to both the context and the researcher

A Case Study for Computer Ethics in Context Michael James Heron,Pauline Helen Belford,2024-03-29 Aimed at addressing the difficulties associated with teaching often abstract elements of technical ethics this book is an extended fictional case study into the complexities of technology and social structures in complex organizations Within this case study an accidental discovery reveals that the algorithms of Professor John Blackbriar are not quite what they were purported to be Over the course of 14 newspaper articles a nebula of professional malpractice and ethical compromise is revealed ultimately destroying the career of a prominent successful academic The case study touches on many topics relevant to ethics and professional conduct in computer science and on the social structures within which computer science functions Themes range from the growing influence of generative AI to the difficulties in explaining complex technical processes to a general audience also touching on the environmental consequences of blockchain technology and the disproportionate gender impacts of Coronavirus Each new revelation in the case study unveils further layers of complexity and compromise leading to new technical and social issues that need to be addressed Directly aimed at making ethics in the digital age accessible through the use of real world examples this book appeals to computer science students at all levels of the educational system as well as making an excellent accompaniment to lecturers and course convenors alike

Metadiscursive Nouns Feng (Kevin) Jiang,2022-06-23 Based on a 17 million word corpus of 160 research articles from both soft and hard knowledge fields this book sets out to explore how a particular type of noun namely the metadiscursive noun is rhetorically used to mediate writer reader interaction in disciplinary writing Analysts of academic discourse have come to regard hedges reporting verbs directives and so on as forming part of a wide repertoire of interactive features available to authors suggesting a variety of terms including evaluation stance appraisal and metadiscourse One aspect which has been less fully explored however is the rhetorical role nouns play in achieving writers persuasive goals This book fills the gap by proposing a particular type of nouns as metadiscursive nouns as in this supports our hypotheses that youth are more likely to offend when neighbourhoods are less disadvantaged The author aims to find out how writers employ metadiscursive nouns to engage and interact with readers in academic prose raising theoretical and pedagogical implications and how they can be applied in the teaching of academic writing This book will be of particular interest to students and scholars working in the areas of English for academic purposes corpus studies academic writing and linguistics in general
