Makers at Work Steven Osborn,2013-09-27 What do you get when you combine an electronics hobbyist hacker garage mechanic kitchen table inventor tinkerer and entrepreneur A maker of course Playful and creative makers are through expertise and experimentation creating art products and processes that change the way we think and interact with the world As you ll see from the 21 interviews in Makers at Work inquisitive makers are just as apt to pick up a laser cutter or an Arduino as a wrench to fashion something new For example you ll meet Jeri Ellsworth who might provide a video lecture on magnetic logic one day and a tutorial on welding a roll bar on a stock car the next You ll also meet Eben Upton who put cheap powerful computing in the hands of everyone with the Raspberry Pi Becky Stern who jazzes up clothing with sensors and LEDs and bunnie Huang who knows the ins and outs of the Shenzhen China electronics parts markets as well as anyone As all the interviews in Makers at Work show makers have something in common reverence for our technical past coupled with an aversion to convention If they can t invent new processes or products it s simply not worth doing Crazy as foxes makers working in the spirit of Tesla Wozniak Edison Gates Musk and many others can bring sophisticated products to the people or to the market as fast or faster than large corporations And they are not just enabling new technologies and devices they are changing the way these devices are funded manufactured assembled and delivered Makers at Work puts a spotlight on the maker mindset and motivation of those who are reinventing the world one object or idea at a time You will Meet the

individuals who define what it means to be a maker Learn about the tools and technologies driving the new industrial revolution Discover ways to scale your weekend project into a profitable business See how others have used to crowdfunding to make their visions a reality Learn how open source hardware and software is enabling whole new categories of products by removing barriers of entry for inventors The new masters of the Makerverse ask two questions Can it be done Is it fun As these interviews will show the answer to both questions is Let's find out *Make: Maverick Scientist* Forrest M. Mims, 2024-02-14 *Maverick Scientist* is the memoir of Forrest Mims who forged a distinguished scientific career despite having no academic training in science Named one of the 50 Best Brains in Science by Discover magazine Forrest shares what sparked his childhood curiosity and relates a lifetime of improbable dramatic and occasionally outright dangerous experiences in the world of science At thirteen he invented a new method of rocket control At seventeen he designed and built an analog computer that could translate Russian into English and that the Smithsonian collected as an example of an early hobby computer While majoring in government at Texas A M University Forrest created a hand held radar like device to help guide the blind And during his military service he had to be given special clearance to do top secret laser research at the Air Force Weapons Lab Why Because while he lacked the required engineering degree they wanted his outside the box thinking on the project He went on to co found MITS Inc producer of the first commercially successful personal computer wrote a series of electronics books for Radio Shack that sold more than seven million copies and designed the music synthesizer circuit that became known as the infamous Atari Punk Console All this came before he started consulting for NASA's Goddard Space Flight Center and NOAA's famous Mauna Loa Observatory and earning the prestigious Rolex Award This intimate portrait of a self made scientist shares a revelatory look inside the scientific community and tells the story of a lifelong learner who stood by his convictions even when pressured by the establishment to get in line with conventional wisdom With dozens of personal photos and illustrations *Maverick Scientist* serves as proof that to be a scientist you simply need to do science
