Sikes, Mikko Pentinsaari, Benoit Godin, Reginald P. Webster, Anthony Davies, Caroline Bourdon, Alfred F. Newton, 2021-08-27 Arctic and Subarctic North America is particularly affected by climate change where average temperatures are rising three times faster than the global average Documenting the changing climate environment of the north requires a structured knowledge of indicator taxa that reflect the effects of climate changes Aleocharine beetles are a dominant group of forest insects which are being used in many projects as indicators of environmental change Many species are forest specialists restricted to certain microhabitats some are generalists and others are open habitat specialists They represent many ecological niches and as such are good indicators for many other species as well The majority of Canadian aleocharine beetle species about 600 spp has been studied and published by Jan Klimaszewski et al 2018 2020 mainly from southern central and western Canada while the northern taxa remain poorly known and documented The aim of the present book is to summarize the knowledge on this insect group in the Arctic and Subarctic North America and to provide a diagnostic and ecological tool for scientists studying and monitoring insects in northern Canada and Alaska The book includes a review of the literature information on 238 species and their habitats taxonomic review images and identification tools *Scientific and Technical Aerospace Reports*, 1973 Photosynthesis in Bryophytes and Early Land Plants David T. Hanson, Steven K. Rice, 2013-10-21 Bryophytes which are important constituents of ecosystems globally and often dominate carbon and water dynamics at high latitudes and elevations were also among the pioneers of terrestrial photosynthesis Consequently in addition to their present day ecological value modern representatives of these groups contain the legacy of adaptations that led to the greening of Earth This volume brings together experts on bryophyte photosynthesis whose

research spans the genome and cell through whole plant and ecosystem function and combines that with historical perspectives on the role of algal bryophyte and vascular plant ancestors on terrestrialization of the Earth The eighteen well illustrated chapters reveal unique physiological approaches to achieving carbon balance and dealing with environmental limitations and stresses that present an alternative yet successful strategy for land plants **On the Wing** Alan Tennant,2010-03-03 In this extraordinary journey Alan Tennant recounts his attempt to track the transcontinental migration of the majestic peregrine falcon an investigation no one before him had ever taken to such lengths From the windswept flats of the Texas barrier islands to the Arctic and then south again into the Caribbean On the Wing provides a hilariously picaresque and bumpy flight **Hearings** United States.
