How Karl Marx Can Save American Capitalism Ronald W. Dworkin, 2015-01-14 When the Cold War ended some people called it the end of history Capitalism and liberal democracy had prevailed Later when the West clashed with radical Islam Americans realized history hadn't ended after all at least not abroad Now in *How Marx Can Save American Capitalism* Ronald W Dworkin shows us that even the home front is in play and capitalism and liberal democracy are threatened Dworkin uses Karl Marx to tip the balance in their favor a paradox as Marx was the sworn enemy of capitalism and liberal democracy but also logical as Marx knew the weak spots in capitalism and democracy better than anyone In the past capitalism's weak spots were obvious sweatshops workhouses and hunger The twentieth century welfare state saved capitalism by fixing them Today's weak spots are less obvious they don't even seem related mass loneliness a declining birth rate young people postponing adulthood and workers using sleep aids to function on the job Yet they pose the same risk to capitalism that child labor and horrid factory conditions once did Marx's ideas applied to contemporary America show how they are all of a piece Saving capitalism demands a third way not rigid Republican conservatism or blind Democratic state interventionism but a new politics in which the state focuses laser like on advanced capitalism's unique threats to private life while leaving much of the free market intact

How To Save Money Hamilton Blanza, 2018-10-17 Some people I just don't have money while others have a lot. Saving accounts full to the brim. What is the mind that makes some people save and others just don't do it? How to convert from a person who can't save to a person who can boast? Saving money is just as much a part of your personality as your religion. You're a person who can't save money. The good news is that the right financial personality can be trained and you will, but surely making money is a part of your life. The brain is like any other body part and it can be trained to become good at anything. For example, you don't know how to diet, but you don't learn to drive a car in the first lesson. The ketogenic diet started small and it's a very important mindset. It's not about making huge savings all the time, but in adopting a small rule that every little adds up. This principle is the most important thing in saving money. Looking for that 100% put in your saving account will not be the trick, especially if you are not a money saver. Making a habit of small saving or not making a habit of saving will help you build a habit which would transform into a big result over a long time. You have to train your brain to save. It's not about making a habit. And like anything else in life, you have to train your mind to learn from your mistakes and persevere to make saving a habit. Part of your religion is doing the fruitful result.
