JavaServer Faces Hans Bergsten, 2004-04-22 JavaServer Faces or JSF brings a component based model to web application development that's similar to the model that's been used in standalone GUI applications for years The technology builds on the experience gained from Java Servlets JavaServer Pages and numerous commercial and open source web application frameworks that simplify the development process In JavaServer Faces developers learn how to use this new framework to build real world web applications The book contains everything you'll need how to construct the HTML on the front end how to create the user interface components that connect the front end to your business objects how to write a back end that's JSF friendly and how to create the deployment descriptors that tie everything together JavaServer Faces pays particular attention to simple tasks that are easily ignored but crucial to any real application working with tabular data for example enabling and disabling buttons And this book doesn't hide from the trickier issues like creating custom components or creating renderers for different presentation layers Whether you're experienced with JSF or just starting

out you'll find everything you need to know about this technology in this book. Topics covered include: The JSF environment, Creating and rendering components, Validating input, Handling user generated events, Controlling page navigation, Working with tabular data, Internationalization, Integration between JSF and Struts, Developing custom renderers and custom components. **JavaServer Faces** is a complete guide to the crucial new JSF technology. If you develop web applications, JSF belongs in your toolkit and this book belongs in your library.

Mastering JavaServer Faces Bill Dudney, Jonathan Lehr, Bill Willis, LeRoy Mattingly, 2004-06-11. Harness the power of JavaServer Faces to create your own server side user interfaces for the Web. This innovative book arms you with the tools to utilize JavaServer Faces JSF, a new standard that will make building user interfaces for J2EE™ applications a lot easier. The authors begin by painting the architectural big picture, covering everything from the Patterns that are used in the implementation to the typical JSF Request/Response lifecycle. Next, you'll learn how to use JSF in the real world by uncovering the various pieces of the JSF component model, such as UI components, events, and validation. The authors then explain how to apply JSF, including how to integrate JSF user interfaces with the Business Tier and how to render your own user interface components. By following this approach, you'll be able to confidently create and validate your own custom applications that meet the needs of your company. Whether working in J2EE or J2SE™, this book will show you how to:

- Use UI Components to build your user interface.
- Ensure that the data you store meets the business rules for your application.
- Integrate JSF with JSPs through the custom Tag feature in JSP implementations.
- Build JSF applications that interact with either EJBs or POJOs.
- Validate a new component and queue events to invoke custom application logic.
- Move your application from Struts to JSF.

Struts: The Complete Reference, 2nd Edition James Holmes, 2007-01-01. Strut your stuff with this completely up to date guide. Struts guru James Holmes has completely revised and updated his definitive bestselling Struts volume. You will get soup to nuts coverage of Struts 1.3, the latest version of the framework used to create flexible, high performance web applications. The book features insider tips, tricks, and techniques to make Struts applications sizzle.

Pro JSF and Ajax Jonas Jacobi, John R. Fallows, 2006-11-22. Pro JSF and Ajax shows you how to leverage the full potential of JavaServer Faces JSF and Ajax. This is not an entry level tutorial, but a book about building Ajax enabled JSF components for sophisticated enterprise level, rich Internet applications. Written by JSF experts and verified by established community figures including Adam Winer, member of the JSF Expert Group, Java Champion Kito D. Mann, JSF Central.com, and JSF in Action, and Matthias Weendorp, MyFaces, this JSF 5 compatible book provides reliable and groundbreaking JSF components to help you exploit the power of JSF in your Java web applications. This book provides a blueprint for building custom JSF user interface components and shows how to leverage the best browser technologies, such as Ajax, Mozilla XUL, and Microsoft HTC, to deliver rich Internet applications. This book covers standard best practices for behavioral and renderer specific component classes, renderers, events, and event listeners, and JSP tag handlers for each. It also covers advanced techniques such as dynamic content type negotiation, JAR based resource delivery, and dynamic render

Foreword Does the world really and truly need another JavaServer Faces book I was fairly well convinced the answer could only be a resounding no After all there s a good half dozen books out in stores today by a whole host of web luminaries and I ve even personally helped as a technical reviewer on half of those So what more could really be said on the subject But when I thought about this a bit more it became clear that all of these books only go so far They ll show you how to use what JSF gives you out of the box throw you a bone for writing your own components and renderers maybe even a bit more But none that I ve seen get to the heart of why JSF is really and truly cool and important technology they make JSF look like YAMVCF Yet Another Model View Controller Framework for HTML more powerful here and there easier to use in many places a bit harder to use in others but really nothing major And certainly nothing that takes us beyond the dull basics of building ordinary looking web applications This book goes a lot further It ll cover the basics of course and show you how to build components but then it keeps going on to AJAX on to HTC on to XUL and how you can wrap this alphabet soup up underneath the heart of JSF its component model and how you can leverage it to finally develop web applications that don t need radical re architecting every time the winds of client technologies blow in a different direction Along the way you ll learn a wide array of open source toolkits that make web magic practical even when you re not a Javascript guru So heck I m convinced The world does need another JSF book Adam Winer Architect ADF Faces JSF Expert Group Member and Java Champion From the Foreword
