Automated Diagnostic Techniques in Medical Microbiology Sunil Kumar,Awanish Kumar,2024-05-13 This book will explore the knowledge of current diagnostic automation techniques applied in the field of clinical microbiology tropical diseases POCT etc There is no such type of book related to this topic This book will help clinicians microbiologists and researchers to make diagnostic algorithms for infectious diseases and help them in early diagnosis Automation in clinical microbiology has revolutionized routine practice in diagnostic cum research in medical microbiology This book covers the recent updates and advances in diagnostic microbiology and provides new techniques related to Genomic Proteomic and metabolomics in microbiology This book will intensely discuss the new and innovative automation techniques available for diagnosis in the microbiology laboratory This book is more focused on automation techniques which are used in the early detection of infectious diseases even caused by rare microorganisms Furthermore this book has complied with the chapters that provide insights to readers with comprehensive and usable knowledge on automation techniques in diagnostic microbiology

Sustainable Development Through Engineering Innovations Harvinder Singh,Puneet Pal Singh Cheema,Prashant Garg,2021-03-01 This book comprises select peer reviewed papers presented at the International Conference on Sustainable Development through Engineering Innovations SDEI 2020 It presents recent advances new directions and opportunities for sustainable and resilient approaches to design and protect the built environment through engineering innovations interventions The topics covered are highly diverse and include all civil engineering and construction related aspects such as construction and environmental Issues durability and survivability under extreme conditions design of new materials for sustainability eco efficient and ultra high performance cementitious materials embedded structural and foundation systems and environmental geomechanics The book will be of potential interest to the researchers and students in the fields of civil engineering architecture and sustainable development Industry 5.0 and

Paradigm Shift—Emerging Challenges Namit Gupta,Roopa Shinde,Rakesh Kumar Malviya,Anjali Gupta,2023-01-23 Industry 5.0 is the successor of the Industry 4.0 concept which employed high technology in the manufacturing industry Industry 5.0 is a new idea that adds a human touch to the work of robots and smart machines The basic idea of humans and machines working together is to increase efficiency and effectivity like the Internet of things IoT It aims to merge the increasing cognitive computing abilities of the robots with the intelligence and resourcefulness of the humans The progress of Industry 5.0 is inevitable As the technology grows more each day we find ways to make our work simpler The development of such technologies to make the world more efficient requires its manufacturers i.e humans who collaborate with these machines and technologies Humans are indispensable resources as what a machine can do is limited And with all these efficiencies we have come so far there is no path leading us back With adoption of new concepts comes a paradigm shift as development continues and we move from Industry 4.0 which speaks of the future of production its primary purpose continues to be achieving seamless connectivity between machines and IT systems for higher productivity and efficiencies across the value chain Overall it focuses mainly on traditional financial and operational KPIs Whereas Industry 5.0 gives a human touch to the concept of 4.0 keeping in mind the well being of the environment and society making the machines and humans work together on a path of Green Future Industry 5.0 has the balance of both humans and technologies which benefits the ecosystem with discovery of new energy sources and renewable resources helping in a sustainable working environment It can be used to reduce harmful residue caused due to manufacturing processes and recycle rare materials Taking this theme the multidisciplinary congress on Industry 5.0 and Paradigm Shift Emerging Challenges will highlight research challenges and open issues that should be further developed to realize Industry 5.0
