Anderson, 2016-12-29 Cases and Exercises in Organization Development Change Second Edition encourages students to practice organization development OD skills in unison with learning about theories of organizational change and human behavior The book includes a comprehensive collection of cases about the OD process and organization wide team and individual interventions including global OD dialogic OD and OD in virtual organizations In addition to real world cases author Donald L Anderson gives students practical and experiential exercises that make the course material come alive through realistic scenarios that managers and organizational change practitioners regularly experience

Formal Methods for Software Architectures Marco Bernardo, 2003-09-12 In the past ten years or so software architecture has emerged as a central notion in the development of complex software systems Software architecture is now accepted in the software engineering research and development community as a manageable and meaningful abstraction of the system under development and is applied throughout the software development life cycle from requirements analysis and validation to design and down to code and execution level This book presents the tutorial lectures given by leading authorities at the Third International School on Formal Methods for the Design of Computer Communication and Software Systems SFM 2003 held in Bertinoro Italy in September 2003 The book is ideally suited for advanced courses on software architecture as well as for ongoing education of software engineers using formal methods in their day to day professional work

Biomedical Informatics Edward H. Shortliffe, James J. Cimino, 2013-12-02 The practice of modern medicine and biomedical research requires sophisticated information technologies with which to manage patient information plan diagnostic procedures interpret laboratory results and carry out investigations Biomedical Informatics provides both a conceptual framework and a practical inspiration for this swiftly emerging scientific discipline at the intersection of computer science decision science information science cognitive science and biomedicine Now revised and in its third edition this text

meets the growing demand by practitioners researchers and students for a comprehensive introduction to key topics in the field Authored by leaders in medical informatics and extensively tested in their courses the chapters in this volume constitute an effective textbook for students of medical informatics and its areas of application The book is also a useful reference work for individual readers needing to understand the role that computers can play in the provision of clinical services and the pursuit of biological questions The volume is organized so as first to explain basic concepts and then to illustrate them with specific systems and technologies

*Serious Play* Michael Schrage,1999-12-10 Successful innovation demands more than a good strategic plan it requires creative improvisation Much of the serious play that leads to breakthrough innovations is increasingly linked to experiments with models prototypes and simulations As digital technology makes prototyping more cost effective serious play will soon lie at the heart of all innovation strategies influencing how businesses define themselves and their markets Author Michael Schrage is one of today s most widely recognized experts on the relationship between technology and work In *Serious Play* Schrage argues that the real value in building models comes less from the help they offer with troubleshooting and problem solving than from the insights they reveal about the organization itself Technological models can actually change us improving the way we communicate collaborate learn and innovate With real world examples and engaging anecdotes Schrage shows how companies such as Disney Microsoft Boeing IDEO and DaimlerChrysler use serious play with modeling technologies to facilitate the collaborative interactions that lead to innovation A user s guide included with the book helps readers apply many of the innovation practices profiled throughout A landmark book by one of the most perceptive voices in the field of innovation

**Assessment in Game-Based Learning** Dirk Ifenthaler,Deniz Eseryel,Xun Ge,2012-06-13 The capabilities and possibilities of emerging game based learning technologies bring about a new perspective of learning and instruction This in turn necessitates alternative ways to assess the kinds of learning that is taking place in the virtual worlds or informal settings accordingly aligning learning and assessment is the core for creating a favorable and effective learning environment The edited volume will cover the current state of research methodology assessment and technology of game based learning There will be contributions from international distinguished researchers which will present innovative work in the areas of educational psychology educational diagnostics educational technology

and learning sciences The edited volume will be divided into four major parts      *Robotics in Education* Wilfried Lepuschitz, Munir Merdan, Gottfried Koppensteiner, Richard Balogh, David Obdržálek, 2017-08-28 This proceedings volume highlights the latest achievements in research and development in educational robotics which were presented at the 8th International Conference on Robotics in Education RiE 2017 in Sofia Bulgaria from April 26 to 28 2017 The content will appeal to both researchers and educators interested in methodologies for teaching robotics that confront learners with science technology engineering arts and mathematics STEAM through the design creation and programming of tangible artifacts giving them the chance to create personally meaningful objects and address real world societal needs This also involves the introduction of technologies ranging from robotics controllers to virtual environments In addition the book presents evaluation results regarding the impact of robotics on students interests and competence development The approaches discussed cover the whole educational range from elementary school to the university level in both formal as well as informal settings      *Doing Gender Diversity* Rebecca F. Plante, Lis M. Mau, 2018-04-17 This cutting edge reader demonstrates the multiple ways in which the universe of gender is socially culturally and historically constructed The selections focus on gender itself how gender operates socioculturally exists functions and is presented in micro and macro interactions In order to avoid balkanization the authors examine the various ways in which culture intersects with individuals to produce the range of presentations of self that we call gender from people born male who become adult men to lesbian women to transmen and everyone else on the diverse gender spectrum      **Building Evaluation** Wolfgang F.E. Preiser, 2013-12-14 This book is about building evaluation in the broadest sense and it transcends the meaning and conventional boundaries of the evolving field of post occupancy evaluation by focusing on evaluation throughout the building delivery process This process is seen not just as being linear with a product in mind i e the completed and occupied building but rather it is seen as a cyclic evolution which has as its goal the continuous improvement of the quality of buildings This goal can only be accomplished if evaluation occurs throughout the building delivery process and if 1 the evaluation that does occur is systematic and rigorous 2 the data that is obtained can be fed into data bases and clearinghouses for use in future generations of buildings and 3 there is continuity in information flow The idea for this book originated with a symposium that was part of a conference held at the Technical University in Delft Netherlands in July of 1988 i e IAPS 10 the tenth biannual conference of the International Association for the Study of People and their Physical Surroundings Authors presented papers based on their book chapters and discussions ensued about the expanded boundaries of the field about theoretical methodological and practical issues as well as applications in building evaluation Other relevant topics were identified and several additional authors were invited to participate in order to round out the contents of this book      *Creating Public Value* Mark H. Moore, 1997-03-25 Moore presents his summation of 15 years of research observation and teaching about what public sector executives should do to improve the performance of public enterprises This book explicates some of the

richest cases used at Harvard s Kennedy School of Government and illuminates their broader lessons for government managers
