International Education Daniel Ness, Chia-Ling Lin, 2015-03-17 This encyclopedia is the most current and exhaustive reference available on international education. It provides thorough up to date coverage of key topics, concepts and issues as well as in depth studies of approximately 180 national educational systems throughout the world. Articles examine education broadly and at all levels from primary grades through higher education, formal to informal education, country studies to global organizations.

Religious Education in Malawi and Ghana Yonah Matemba, Richardson Addai-Mununkum, 2021-03-15 Religious Education in Malawi and Ghana contributes to the literature on opportunities and complexities of inclusive approaches to Religious Education (RE). It analyses how RE in Malawi and Ghana engages with religious pluralisation and provides a compelling case for the need to re-evaluate current approaches in the conceptualisation, curriculum design and delivery of RE in schools in Malawi and Ghana. The book explains how a pervasive tradition of selection involving exclusion and inclusion of religion in RE leads to misrepresentation and in turn to misclusion of non normative religions where religion is included but marginalized and misrepresented. The book contributes to wider discourse of RE on opportunities as well as complexities of post-confessional approaches including the need for RE to avoid perpetuating the continued legitimisation of selected religions and in the process the delegitimisation of the religious other as a consequence of misrepresentation and misclusion. Inspired by Braten's methodology for comparative studies in RE, the book draws on two qualitative studies from Malawi and Ghana to highlight the pervasive problems of religious misclusion in RE. This book will be of great interest for academics, scholars and post graduate students in the fields of RE, African education, educational policy, international education and comparative education.

Education, Communication and Democracy in Africa Chikumbutso Herbert Manthalu, Victor Chikaipa, Anthony Mavuto Gunde, 2021-07-22 This innovative volume critically examines the intersection between democracy, education and communication in African educational domains. Providing a platform for multidisciplinary research, it advances scholarship in democratic citizenship education in African higher education through methodological and theoretical innovation. The book discusses the extent to which explicit or subtle communication frameworks that underlie policymaking, institutional culture, teaching and learning experiences in African higher education significantly engender democratic mind habits and practices in students as citizens. Chapters in the book examine how communication frameworks in pedagogy ought to navigate power imbalances between students on the one hand and the institution and academics on the other. The book also examines how dis-empowering higher education policies are and whether they contribute to democratic equality. This book will be of great interest to academics, researchers and post graduate students in the fields of education, democratic citizenship education, communication and African studies.
