Advances in Management Accounting Chris Akroyd,2023-10-24 Volume 35 of Advances in Management Accounting features a diverse range of authors from Australia Canada New Zealand and the United States of America focusing on theoretically sound and practical management accounting research which has a cutting edge and wide reaching appeal to both academics and practitioners

Game Theory in Management Accounting David Mueller,Ralf Trost,2017-09-21 This book demonstrates what kind of problems originating in a management accounting setting may be solved with game theoretic models Game theory has experienced growing interest and numerous applications in the field of management accounting The main focus traditionally has been on the field of non cooperative behaviour but the area of cooperative game theory has developed rapidly and has received increasing attention Intensive research in

combination with the changing culture of publishing has produced a nearly unmanageable number of publications in the areas concerned. Therefore one main purpose of this volume is providing an intensive analysis of the intersection of these areas. In addition the book strengthens the relationship between the theory and the practical applications and it illustrates the two sided relationship between game theory and management accounting. New game theoretic models offer new fields of applications and these applications raise new questions for the theory.

Corporate Planning and LAN Ru Michael Sabre, J. Edward Ketz, 2014-05-10. Corporate Planning and LAN Information Systems as Forums provides information pertinent to the Forum Information System FIS, a conceptual basis for all corporate planning. This book presents an information system which by means of LAN organizational development style prototyping and organizational learning utilization can open communications among managers, executives, owners and employees in a corporate setting. Organized into 10 chapters, this book begins with an overview of the four phases to the eventual use of the FIS in a corporate setting. This text then explores FIS as part of a paradigm shift in corporate information systems which began with the introduction of the use of computers. Other chapters consider the actual creation of the LAN based FIS, the technical details of implementation, the programming and the hardware configuration. This book discusses as well the organizational learning that occurs when using the system. This book is a valuable resource for executives, managers, employees and corporate decision makers.

Proceedings of the XIII International Symposium SymOrg 2012: Innovative Management and Business Performance, 2012-06-03. **Improving an existing CIS by examining customer decisions, development, and planning to increase the effectiveness for ISC and ISM** Peter Sauer, 2002-08-30. Inhaltsangabe Abstract More and more companies apply electronic information systems in all their business areas. In the past many of these systems pertained to one specific user group. However, due to high efforts and investments for maintaining these information flows, companies tend to increase the amount of attracted user groups. Thereby the users must deal with more and more information every day. In addition they must select the relevant information which serves as a basis for their decisions on their own. This procedure and the included irrelevant information generate high efforts due to rework requirements. Therefore users reject more and more information. All these conditions combined with a two user group oriented customer information system require output adjustments to the user specific needs. Consequently it is necessary to identify the users, their needs and the potential effectiveness of specific information provided by a specific system. This thesis refers to theoretical analysis models for generating an optimal concept. Thereby it considers methods analyzing the original information system, aims user groups, their needs and the way the provided information flow can meet all these requests. These considerations represent actual conditions of Varta Gerätebatterie GmbH. Afterwards this research compares the optimal with the actual situation in order to deduct appropriate improvement steps. Finally this thesis suggests possible integrations and constitutes the related advantages and disadvantages based on cost accounting and information management theory. The information flow analysis

demonstrates the importance of finding appropriate methods and the key role of defining all users Moreover it emphasizes the significance of adjusting this flow to user needs in regular intervals due to the rapidly changing environment The analysis of the information preparation and output indicates that communication plays a key role in exchanging information The analysis of the optimal and the actual information system display several gaps which VARTA should close The actual situation analysis includes company conditions Therefore it is valid for practical implementation These gaps pertain to the improvement procedure as well as to completely new integration issues Inhaltsverzeichnis Table of Contents List of abbreviationsii List of abbreviationsiii Index of appendicesiv List of definitionsvi List of definitions *Advances in Accounting Education* Leslie A.
