Management Principles P. J. Smit, 2007 Book CD To improve on an award-winning book poses a major challenge to its authors. The authors of this book took the challenge head-on by conducting a major research study to determine what exactly the outcomes are that managers at different levels must deliver in contemporary organisations in South Africa and the rest of Africa. The findings of this study, which dealt with current and near future management issues as well as classical and contemporary thinking about management, were used as the blueprint for the updating of this book. After placing management in context, the authors deal with the knowledge, skills, and dispositions required of managers to perform the management functions of planning, organising, leading, and controlling in a volatile business world. Examples of how the functions are applied in practice are cited throughout the book. These examples refer mainly to South African organisations and situations that managers in South Africa and Africa have to deal with to create and sustain a competitive advantage for their organisations. The book endeavours to break down the silo effect of seeing the management functions as separate activities. This is done by continuously placing the management function at hand in a bigger context. This enables learners of management to assess the implications of management decisions on different people, processes, systems, and so on that make up the organisation.

Handbook of Research on Management and Organizational History Kyle Bruce, 2020-04-24 Emerging from what was a somewhat staid sub-discipline, there is currently a battle for the soul of Management and Organizational History (MOH) at the centre of which is a widespread concern that much recent work has been more about how one should or might do history rather than actually doing historical work. If ever there was a time for a new volume on MOH, this is certainly it.

Public Management and Complexity Theory Mary Lee Rhodes, Joanne Murphy, Jenny Muir, John A. Murray, 2010-10-04 That public services exhibit unpredictability novelty and on occasion chaos is an observation with which even a casual observer would agree Existing theoretical frameworks in public management fail to address these features relying more heavily on attempts to eliminate unpredictability through increased reliance on measurable performance objectives improved financial and human resource management techniques decentralisation of authority and accountability and resolving principal agent behaviour pathologies Essentially these are all attempts to improve the steering capacity of public sector managers and policy makers By adopting a Complex Adaptive Systems CAS approach to public services this book shifts the focus from developing steering techniques to identifying patterns of behaviour of the participants with the ultimate objective of increasing policy makers and practitioners understanding of the factors that may enable more effective public service decision making and provision The authors apply a CAS framework to a series of case studies in public sector management to generate new insights into the issues processes and participants in public service domains
