Disrupting Corporate Culture David G. White, Jr, 2020-08-17 Research in cognitive science over the last 30 years shows much of what we know about culture in the business world is based on myth wishful thinking outdated science or is just plain wrong This is why culture shaping and change programs in organizations often amount to little more than sloganeering with minimal impact on the lived experience of employees This book bridges the gap between the latest research on cognitive science and culture providing a valuable guide for change leaders CEOs and practitioners on how to sustainably work with and change this important resource It answers many of the major questions that have plagued culture work such as Why so many CEOs and management consultants preach culture change when so few culture interventions actually succeed Why CEOs persist in believing culture starts at the top when virtually no research in anthropology supports that claim Why most culture shaping approaches have no answer for how to affect culture in global companies Why culture doesn't cause us to do anything yet we persist in believing that somehow it does Why so many culture shaping projects focus on corporate values despite the fact modern science shows why changing personal values is exceedingly difficult What we are learning about culture from the last 30 years of cognitive science gives us the foundation for far more impactful and sustainable interventions than have been possible to date This book explains why showing how everyday business practices well beyond HR are key to culture change Why Because the brain's synaptic plasticity can only be altered through new sustained and widespread organizational habits and routines This groundbreaking practical guide will show you finally how to realize the full power of culture as a transformational empowering and competitive resource

Oxygen Transport to Tissue XIX David T. Delpy, 2013-11-11 In 1996 for its 24th scientific meeting the International Society on Oxygen Transport to Tissue made its third visit to the United Kingdom. The previous two meetings were held in Cambridge in 1977 and 1986 but this was the first meeting to be held north of the border in Scotland. It was attended by some 186 delegates and accompanying persons and there were 128 presentations. The venue was the West Park Centre, the University of Dundee's residential conference centre and ISOTT was only the second major meeting to be held there using the new Villa accommodation. Dundee's slogan is City of Discovery since it became the permanent home of the Royal Research Ship Discovery which was built in the city and was used by Captain Scott on his first expedition to the Antarctic. The ISOTT meeting also fulfilled its promise of being a meeting of discovery with sessions on all aspects of oxygen transport to tissue. The inclusion of a session on oxygen transport in vascular disease reflected the interests of the local participants. All of the manuscripts were reviewed both for their scientific and editorial acceptability and in some 50% of cases revisions were requested from the authors. Some manuscripts were ultimately rejected. However in view of the importance of producing the Proceedings as quickly as possible it is possible that some minor errors may have slipped through for which the editors apologise.

International Bohemia Daniel Cottom, 2013-03-06 How did this vagabond word bohemia migrate across national borderlines over the course of the nineteenth century and what happened to it as it traveled? In *International Bohemia* Daniel Cottom studies how various individuals and groups appropriated this word to serve the identities, passions, cultural forms, politics, and histories they sought to animate. Beginning with the invention of bohemianism's modern sense in Paris during the 1830s and 1840s, Cottom traces the twists and turns of this phenomenon through the rest of the nineteenth century and into the early years of the twentieth century in the United States, England, Italy, Spain, and Germany. Even when they traveled under the banner of *l'art pour l'art*, the bohemians of this era generally saw little reason to observe borderlines between their lives and their art. On the contrary, they were eager to mix up the one with the other despite the fact that their critics often reproached them on this account by claiming that bohemians were all talk, doing nothing, frittering away their lives in cafés and taverns. Cottom's study of bohemianism draws from the biographies of notable and influential figures of the time, including Thomas Chatterton, George Sand, George Eliot, Henry Murger, Alexandre Privat d'Anglemont, Walt Whitman, Ada Clare, Iginio Ugo Tarchetti, and Arthur Conan Doyle. Through a wide range of novels, memoirs, essays, plays, poems, letters, and articles, *International Bohemia* explores the many manifestations of this transnational counterculture, addressing topics such as anti-Semitism, the intersections of race and class, the representation of women, the politics of art, and masquerade, the nature of community, and the value of nostalgia.

Scientific and Technical Aerospace Reports, 1972. Recycled Materials and by Products in Highway Applications. Mary Stroup-Gardiner, Tanya Wattenberg-Komas, 2013. Recycled materials and industrial byproducts are being used in transportation applications with increasing frequency. There is a growing body of experience showing that these materials work well in highway applications. This study gathers the experiences of transportation agencies in determining the relevant properties of recycled materials and industrial byproducts and the beneficial use for highway applications. Information for this study was acquired through a literature review and surveys and interviews with state department of transportation staff. The report will serve as a guide to states revising the provisions of their materials specifications to incorporate the use of recycled materials and industrial byproducts and should thereby assist producers and users in leveling the playing field for a wide range of dissimilar materials.
