Policy-Making in the GCC Neil Quilliam,Mark C. Thompson,2017-09-11 The GCC is a major player in the post 2011 reordering of the Middle East Despite the rise in prominence of individual Gulf states especially Kuwait Qatar Saudi Arabia and the United Arab Emirates and the growth of the GCC as a collective entity surprisingly little attention has been paid to the actual mechanics of policy making in the region This book analyses the vital role that institutions are coming to play in shaping policy in the Gulf Arab states The research coincides with two key developments that have given institutions new importance in the policy process the emergence of a new generation of leaders in the Gulf and the era of low oil prices Both developments along with dramatic demographic change have compelled state and citizens to re evaluate the nature of the social contract that binds them together Contributors assess the changing relationship between state and citizen and evaluate the role that formal and informal institutions play in mediating such change and informing policy The book shows how academic social and economic institutions are responding to the increasingly complex process of decision making where citizens demand better services and further empowerment and states are obliged to seek wider counsel although wanting to retain ultimate authority With contributions from both academics and practitioners this book will be highly relevant for researchers and policymakers alike

**Conceptual Maths** Peter Mattock,2023-04-05 Written by Peter Mattock Conceptual Maths Teaching about rather than just how to do mathematics in schools aims to empower teachers to support students on a comprehensive and coherent journey through school mathematics Showcasing the best models metaphors and representations it provides excellent examples explanations and exercises that can be used across the curriculum Concepts are at the heart of the study of mathematics They are the ideas that remain constant whenever they are encountered but which combine and build upon each other to create the mathematical universe It is the structure of each concept that gives

rise to the procedures that are used in calculation and problem solving and by learning about these structures a learner can make sense of how different processes work and use them flexibly as need demands In his first book *Visible Maths* Peter Mattock focused on the use of representations and manipulatives as images and tools and how this can provide a window into some of these mathematical structures His aim in *Conceptual Maths* is to go deeper beyond the procedures and to shed greater light on the structures of the subject's different concepts The book explores how a variety of visual tools and techniques can be used in the classroom to deepen pupils' understanding of mathematical structures concepts and operations including number addition and subtraction multiplication and multiples division and factors proportionality functionality measures accuracy probability shape and transformation and vectors among many others In so doing Peter equips teachers with the confidence and practical know how to help learners assimilate knowledge of mathematical concepts into their schema and take their learning to the next level Containing numerous full colour diagrams and models to illustrate the conceptual takeaways and teaching techniques discussed *Conceptual Maths* also includes a glossary covering the key mathematical terms Suitable for teachers of maths in primary secondary and post 16 settings **Teaching Mathematics**

**Further Perspectives on Researching Play from a Playwork Perspective** Pete King,Shelly Newstead,2020-10-08 Building on the success of the first volume of Researching Play from a Playwork Perspective this book further develops the crucial research of playwork as an emerging and unique discipline The first volume explored how an understanding of

playwork theory and practice can inform research into children's play. From the seven contributors, four common themes to researching play from a playwork perspective were identified: rights-based, process, critical reflection, and playfulness. This second volume aims to explore these four factors from two angles. The first considers how four more playworkers have researched play in four different contexts: prison, gender, and toys in Dutch play provision, and in the area of autism. In the second part of the book, the four pillars of playwork research are explored by academics from other disciplines with an interest in playwork research. This will be of great interest to researchers and upper-level students in the fields of playwork, childcare, early years education, psychology, and children's rights. It will also appeal to practitioners in a wide variety of professional contexts, including childcare and therapy.

### **Global Approaches to Early Learning Research and Practice**

Kenneth R. Pugh, Peggy McCardle, Annie Stutzman, 2018-02-26. The health, development, and learning of many young children living in disadvantage areas are at serious risk. Access to education has improved under the United Nations Millennium Development Goals, and there are now programs in low and middle-income countries that are aimed at improving instruction and learning. The research and evaluation on the effectiveness of such programs show there are significant challenges but also some successes. This issue features presentations of leading international scientists, representatives from key governmental and non-governmental organizations, and others working with programs in the developing world and disadvantaged populations. The presentations describe the goals, existing challenges, and potential approaches to providing evidence-based programs to young children in rural, remote, and poverty-stricken areas. Topics covered include the state of early childhood in low and middle-income nations, programs that have shown some success, and innovative research approaches that have been often considered unfeasible in these contexts. This is the 158th volume in this Jossey-Bass series, *New Directions for Child and Adolescent Development*. Its mission is to provide scientific and scholarly presentations on cutting-edge issues and concepts in this subject area. Each volume focuses on a specific new direction or research topic and is edited by experts from that field.
