Islam And Travel In The Middle Ages:

Islam and Travel in the Middle Ages Houari Touati, 2010-08 In the Middle Ages Muslim travelers embarked on a rihla or world tour as surveyors emissaries and educators On these journeys voyagers not only interacted with foreign cultures touring Greek civilization exploring the Middle East and North Africa and seeing parts of Europe they also established both philosophical and geographic boundaries between the faithful and the heathen These voyages thus gave the Islamic world which at the time extended from the Maghreb to the Indus Valley a coherent identity Islam and Travel in the Middle Ages assesses both the religious and philosophical aspects of travel as well as the economic and cultural conditions that made the rihla possible Houari Touati tracks the compilers of the hadith who culled oral traditions linked to the prophet the linguists and lexicologists who journeyed to the desert to learn Bedouin Arabic the geographers who mapped the Muslim world and the students who ventured to study with holy men and scholars Travel with its costs discomforts and dangers emerges in this study as both a means of spiritual growth and a metaphor for progress Touati's book will interest a broad range of scholars in history literature and anthropology East Meets West in the Middle Ages and Early Modern Times Albrecht Classen, 2013-09-03 This new volume explores the surprisingly intense and complex relationships between East and West during the Middle Ages and the early modern world combining a large number of critical studies representing such diverse fields as literary German French Italian English Spanish and Arabic and other subdisciplines of history religion anthropology and linguistics The differences between Islam and Christianity erected strong barriers separating two global cultures but as this volume indicates despite many attempts to Other the opposing side the premodern world experienced an astonishing degree of contacts meetings exchanges and influences Scientists travelers authors medical researchers chroniclers diplomats and merchants criss crossed the East and the West or studied the sources produced by the other culture for many different reasons As much as the theoretical concept of Orientalism has been useful in sensitizing us to the fundamental tensions and conflicts separating both worlds at least since the eighteenth century the premodern world did not quite yet operate in such an ideological framework Even though the Crusades had violently pitted Christians against Muslims there were countless contacts and a palpable curiosity on both sides both before during and after those religious warfares Globalism in the Middle Ages and the Early Modern Age Albrecht Classen, 2023-09-05 Although it is fashionable among modernists to claim that globalism emerged only since ca 1800 the opposite can well be documented through careful comparative and transdisciplinary studies as this volume demonstrates offering a wide range of innovative perspectives on often neglected literary philosophical historical or medical documents Texts images ideas knowledge and objects migrated throughout the world already in the pre modern world even if the quantitative level compared to the modern world might have been different In fact by means of translations and trade for instance global connections were established and maintained over the centuries Archetypal motifs developed in many literatures indicate how much pre modern people actually shared But we also

discover hard core facts of global economic exchange import of exotic medicine and on another level intensive intellectual debates on religious issues Literary evidence serves best to expose the extent to which contacts with people in foreign countries were imaginable often desirable and at times feared of course The pre modern world was much more on the move and reached out to distant lands out of curiosity economic interests and political and military concerns Diplomats crisscrossed the continents and artists poets and craftsmen traveled widely We can identify for instance both the Vikings and the Arabs as global players long before the rise of modern globalism so this volume promises to rewrite many of our traditional notions about pre modern worldviews economic conditions and the literary sharing on a global level as perhaps best expressed by the genre of the fable **Routledge Revivals: Medieval Islamic Civilization (2006)** Josef

Ghiloni,2019-08-01 Motivated by the intellectual historian Shahab Ahmed s observation that the history of Islamic paideia has yet to be written Islam as Education explores multiple forms that the search for knowledge and the transmission of wisdom have taken in Islam focusing on the classical period 800 1500 CE Ghiloni draws on a wide range of Islamic primary source material ranging from sacred texts and parables to neglected pedagogical literature and paintings He depicts three Islamic religious practices pilgrimage prophecy and jihad as modes of pedagogy embodied ways of defining defusing and defending sacred knowledge Islam as Education s educational heuristic not only aids in understanding Islam but also provides guidance for intercultural and interreligious relations Ghiloni argues that Islam s grand knowledge tradition serves as a bridge between Muslims and non Muslims and compares it with the educational theory of John Dewey the celebrated American pragmatist Based on this discussion a final chapter develops

Michael Gerli, Ryan D. Giles, 2021-05-30 The Routledge Hispanic Studies Companion to Medieval Iberia Unity in Diversity draws together the innovative work of renowned scholars as well as several thought provoking essays from emergent academics in order to provide broad range in depth coverage of the major aspects of the Iberian medieval world Exploring the social political cultural religious and economic history of the Iberian Peninsula the volume includes 37 original essays grouped around fundamental themes such as Languages and Literatures Spiritualities and Visual Culture This interdisciplinary volume is an excellent introduction and reference work for students and scholars in Iberian Studies and Medieval Studies SERIES EDITOR BRAD EPPS SPANISH LIST ADVISOR JAVIER MU OZ BASOLS **Edging Toward Iberia** Jean Dangler, 2017-06-30 Nonmodern Iberia was a fluid space of shifting political kingdoms and culturally diverse communities Scholars have long used a series of obsolete investigative frameworks such as the Reconquista along with modern ideas of nation states periodization and geography that are inadequate to the study of Iberia's complex heterogeneity In Edging Toward Iberia Jean Dangler argues that new tools and frameworks for research are needed She proposes a combination of network theory by Manuel Castells and World Systems Analysis as devised by Immanuel Wallerstein to show how network and system principles can be employed to conceptualize and analyze nonmodern Iberia in more comprehensive ways Network principles are applied to the well known themes of medieval trade and travel along with the socioeconomic conditions of feudalism slavery and poverty to demonstrate how questions of power and temporal historical change may be addressed through system tenets Edging Toward Iberia challenges current historical and literary research methods and brings a fresh perspective on the examination of politics identity and culture *Travel, Time, and Space in the Middle Ages and Early Modern Time* Albrecht Classen, 2018-10-22 Research on medieval and early modern travel literature has made great progress which now allows us to take the next step and to analyze the correlations between the individual and space throughout time which contributed essentially to identity formation in many different settings The contributors to this volume engage with a variety of pre modern texts images and other documents related to travel and the individual's self orientation in foreign lands and make an effort to determine the concept of identity within a spatial framework often determined by the meeting of various cultures Moreover objects images and words can also travel and connect people from different worlds through books The volume thus brings together new scholarship focused on the interrelationship of travel space time and individuality which also includes of course women's movement through the larger world whether in concrete terms or through proxy travel via readings Travel here is also examined with respect to craftsmen's activities at various sites artists employment for many different projects all over Europe and elsewhere and in terms of metaphysical experiences catabasis **How Europe Made the Modern World**

Jonathan Daly, 2019-10-03 One thousand years ago a traveler to Baghdad or the Chinese capital Kaifeng would have discovered a vast and flourishing city of broad streets spacious gardens and sophisticated urban amenities meanwhile Paris Rome and London were cramped and unhygienic collections of villages and Europe was a backwater How then did it rise to world preeminence over the next several centuries This is the central historical conundrum of modern times How Europe Made the Modern World draws upon the latest scholarship dealing with the various aspects of the West's divergence including geography demography technology culture institutions science and economics It avoids the twin dangers of Eurocentrism and anti Westernism strongly emphasizing the contributions of other cultures of the world to the West's rise while rejecting the claim that there was nothing distinctive about Europe in the premodern period Daly provides a concise summary of the debate from both sides whilst also presenting his own provocative arguments Drawing on a wide range of primary and secondary sources and including maps and images to illuminate key evidence this book will inspire students to think critically and engage in debates rather than accepting a single narrative of the rise of the West It is an ideal primer for students studying Western Civilization and World History courses
