While many of the basic principles of superior IS operations have not changed over the years, we still have to do backups, service business users and so on the Internet, and an explosion of connectivity options have added new challenges to running an effective IS organization. No two information systems operations are alike, but many do share some basic elements such as hardware, software and personnel. This manual defines the common threads that link all information systems operations, providing for a variety of situations, not as a one-size-fits-all model but instead as an updated guide and decision-making reference that can help you to devise an information systems policy and procedure program uniquely tailored to the needs of your organization. Rather than simply provide sample policies that will not encompass what is unique to your organization, this manual gives you the information you need to develop useful and effective policies for your unique environment.
