The Practice of Consumer Exposure Assessment Gerhard Heinemeyer, Matti Jantunen, Pertti Hakkinen, 2020-01-03 This book closes a current gap by providing the scientific basis for consumer exposure assessment in the context of regulatory risk assessment Risk is defined as the likelihood of an event occurring and the severity of its effects The margin between the dose that leads to toxic effects and the actual dose of a chemical is identified by estimating population exposure The objective of this book is to provide an introduction into the scientific principles of consumer exposure assessment and to describe the methods used to estimate doses of chemicals the statistics applied and computer tools needed This is presented through the backgrounds of the special fields in exposure analysis such as exposure via food and by the use of consumer products toys clothing and other items As a general concept human exposure is also understood to include exposure via the environment and from the work setting In this context the specific features of consumer exposure are pointed out and put into the context of regulation in particular food safety chemicals safety REACH and consumer product safety The book is structured into three parts The first part deals with the general concepts of consumer exposure as part of the overall risk analysis framework of risk characterization risk assessment and risk communication It describes the three basic features of exposure assessment i the exposure scenario ii the exposure model and iii the exposure parameters addressing external and internal exposure Also the statistical presentation of data to characterize populations in connection with variability uncertainty and quality of information and the

presentation of exposure evaluation results is described The second part deals with the specific issues of exposure assessment exposure via food consumption exposure from use of consumer products household products toys cosmetic products textiles pesticides and others This part also covers methods for acquisition of data for exposure estimations including the relevant information from regulations needed to perform an accurate exposure assessment The third part portrays a prospect for further needs in the development and improvement of consumer exposure assessment as well as international activities and descriptions of the work of institutions that are involved in exposure assessment on the regulatory and scientific level And conversely it creates the rationale for the exposure assessment details necessary to satisfy regulatory needs such as derivation of upper limits and risk management issues *Global Mobile Satellite Communications*
