computer algebra symbolic mathematical systems compares and contrasts their strengths and weaknesses and gives tutorial
information for using these systems in various ways Compares different packages quantitatively using standard test suites
Ideal for assessing the most appropriate package for a particular user or application Examines the performance and future
developments from a user s and developer s viewpoint Internationally recognized specialists overview both the general and
special purpose systems and discuss issues such as denesting nested roots complex number calculations efficiently
computing special polynomials solving single equations and systems of polynomial equations computing limits multiple
integration solving ordinary differential and nonlinear evolution equations code generation evaluation and computer algebra
in education The historical origins computer algebra resources and equivalents for many common operations in seven major
packages are also covered By providing such a comprehensive survey the experienced user is able to make an informed
decision on which system s he or she might like to use It also allows a user new to computer algebra to form an idea of where
to begin Since each system looked at in this book uses a different language many examples are included to aid the user in
adapting to these language differences These examples can be used as a guide to using the various systems once one
understands the basic principles of one CAS The book also includes contributions which look at the broad issues of the needs
of various users and future developments both from the user s and the developer s viewpoint The author is a leading figure in
the development and analysis of mathematical software and is well known through the Wester test suite of problems which
provide a bench mark for measuring the performance of mathematical software systems The book will help develop our
range of titles for applied mathematicians The book will provide a unique fully up to date and independent assessment of
particular systems and will be of interest to users and purchasers of CAS s **Canadiana** ,1986 **EPA Publications**
