1. What are four functions of cells that are dependent on cell organelles? Cells capture, store, release, alter or modify, and use materials that energy used to make new cell materials.
2. Compare the function of small membrane vesicles with a cell wall. Cell wall separates outside the cell from the inside and is made of a rigid cell wall of a plant cell.
3. Why do plants need chloroplasts? Chloroplasts contain the pigment that plants need to make their food.
4. Explain why humans are not like plants and cannot survive long-term without the help of bacteria. Humans are not able to make their own food. Bacteria convert wastes from other food. Unless bacteria are added, plants, fungi, and animals are not able to survive.
5. Is it better to have a cell that has fewer or a larger number of organelles? The more organelles a cell has, the more essential that it is to the survival of the organism. Could there still be a multicellular organism? Explain. Yes, a cell without many organelles is a simple cell like a red blood cell.
