Interactive Collaborative Learning Michael E. Auer, David Guralnick, James Uhomoibhi, 2017-01-07 This book presents the proceedings of the 19th International Conference on Interactive Collaborative Learning held 21-23 September 2016 at Clayton Hotel in Belfast UK. We are currently witnessing a significant transformation in the development of education. The impact of globalisation on all areas of human life, the exponential acceleration of developments in both technology and the global markets, and the growing need for flexibility and agility are essential and challenging elements of this process that have to be addressed in general but especially in the context of engineering education. To face these topical and very real challenges, higher education is called upon to find innovative responses. Since being founded in 1998, this conference has consistently been devoted to finding new approaches to learning with a focus on collaborative learning. Today, the ICL conferences have established themselves as a vital forum for the exchange of information on key trends and findings and of practical lessons learned while developing and testing elements of new technologies and pedagogies in learning.

Providing students with a thought-provoking account of America's past, *The American People* examines how American society assumed its present shape and developed its present forms of government. A strong social emphasis underscores the humanness of America's history as revealed through the everyday lives of ordinary Americans. In addition, 'Recovering the Past' essays acquaint students with the work that historians do by introducing them to the fascinating variety of materials that historians use to understand and interpret the past. Two new primary source features, 'American Voices' and 'How Others See Us', enliven the narrative with short passages from both ordinary and extraordinary Americans or from outsiders commenting on the American nation or its people.
