Military Forms For 2015 In South Africa:

Researching the Military Helena Carreiras, Celso Castro, Sabina Frederic, 2016-03-02 Researching the Military focuses on the experiences of researchers who study the military around the world. It explores the historical, social, institutional, and personal factors that frame research and scrutinize the way knowledge in this area impacts society and policy. More than merely analyzing research experiences yet necessarily including them, it is also about the experiences of researchers, their position with regard to the object of their studies, the institutional context where they work, and the way their research impacts the academic and policy-making fields in the respective countries. The common theme to the various chapters is reflexivity, a conscious effort at addressing the conditions of research and the position of the researcher and the research participants in that interface. By collecting diverse experiences of researchers from across the world, this volume aims to enhance reflexivity in the field of military studies and to encourage the exchange of knowledge between the academic field and the military arena. This book will be of much interest to students of military studies, research methods, sociology, social anthropology, and security studies in general. *'Africa Forms the Key'* Suryakanthie Chetty, 2021-01-04 This book examines the work of prominent South African geologist Alex Du Toit as a means of understanding the debate around continental drift both in segregation-era South Africa and internationally. It contextualises Du Toit's work within a particularly formative period of South African science from the paleoanthropological discoveries that sparked debates about the origins of humankind to Jan Smuts' own theory of holism. Beyond South African scientific discoveries, the book sets Du Toit's work against a backdrop of ideological struggles over space both domestically in terms of segregation and nationalism as well as internationally as South Africa sought to assert its position within the Commonwealth. These debates were embodied by Du Toit's work on the theory of continental drift which put Africa and South Africa at the centre geologically and geographically. The author also focuses on the divisions in geology caused by drift theory, tracing the vigorous intellectual debate and dissent indicative of the ideological milieu within which scientific thought is constructed. It traces the history of continental drift from its inception in the nineteenth century and later work of Alfred Wegener which was both elaborated upon and substantiated by Du Toit. The study further focuses on Du Toit's research on continental drift in South Africa and South America and the geological fossil and climatological evidence used to bolster this theory. *Military, Politics and Democratization in Southern Africa* Tendai Chari, Patrick Dzimiri, 2023-08-10 This book explores multiple challenges faced by democratization in Southern Africa. Applying a wider lens to the concept of political transition and employing a variety of theoretical and methodological approaches, the contributions gathered here explore residual political/cultural practices that hinder democratic consolidation in Southern Africa. Presenting various case studies, the book tackles themes such as the military-political nexus, leadership renewal, constitutionalism, electoral politics, election violence, marginalization of women, civil society, and political transition, media framing, and transitional justice. Written from a multidisciplinary perspective and drawing on

empirical data from multiple sources this edited volume challenges orthodox conceptualizations of political transition The book will be of interest to students and scholars of political science African studies and related fields as well as policy makers and professionals interested in the latest political developments in Southern Africa *South Africa's Post-Apartheid Military* Lindy Heineken, 2020-01-01 This timely book examines how the South African National Defence Force has adapted to the country's new security political and social environment since 1994 In South Africa's changed political state how has civilian control of the military been implemented and what does this mean for defence in a democracy This book presents an overview of the security environment how the mission focus of the military has changed and the implications for force procurement force preparation force employment and force sustainability The author addresses other issues such as the effect of integrating former revolutionary soldiers into a professional armed force the effect of affirmative action on meritocracy recruitment and retention military veterans looking at the difficulties they face in reintegrating back into society and finding gainful employment gender equality and mainstreaming the rise of military unions and why a confrontational instead of a more corporatist approach to labour relations has emerged HIV AIDS and the consequences this holds for the military in terms of its operational effectiveness In closing the author highlights key events that have caused the SANDF to become lost in transition and transformation spelling out some lessons learned The conclusions she draws are pertinent for the future of defence security and civil military relations of countries around the world **Private Military and Security**
