Designing Aeration Systems using Baseline Mass Transfer Coefficients Johnny Lee, 2021-07-29 The book is about the discovery of a Standard Specific Baseline Mass Transfer Coefficient KLa_0 20 that represents a revolutionary change in the understanding designing and operation of aeration equipment as well as providing a baseline for future research and development for water and wastewater treatment systems It discusses the use of the Standard Model for oxygen transfer to determine the baseline and its major finding is to show that the gas transfer model is a consistent relativistic theory of molecular interactions Previously the challenge was the appearance of divergences in the mass transfer coefficient estimations that defies aeration design This normalization to a baseline is a great achievement in physics and engineering
