Technologies of Enchantment? Duncan Garrow, Chris Gosden, 2012-08-02 While Celtic art includes some of the most famous archaeological artefacts in the British Isles such as the Battersea shield or the gold torcs from Snettisham it has often been considered from an art historical point of view Technologies of Enchantment Exploring Celtic Art attempts to connect Celtic art to its archaeological context looking at how it was made used and deposited Based on the first comprehensive database of Celtic art it brings together current theories concerning the links between people and artefacts found in many areas of the social sciences The authors argue that Celtic art was deliberately complex and ambiguous so that it could be used to negotiate social position and relations in an inherently unstable Iron Age world especially in developing new forms of identity with the coming of the Romans Placing the decorated metalwork of the later Iron Age in a long term perspective of metal objects from the Bronze Age onwards the volume pays special attention to the nature of deposition and focuses on settlements hoards and burials including Celtic art objects links with other artefact classes such as iron objects and coins A unique feature of the book is that it pursues trends beyond the Roman invasion

Evans,Grahame Appleby,Sam Lucy,2015-12-31 The excavations led by Margaret and Tom Jones on the Thames gravel
terraces at Mucking Essex undertaken between 1965 and 1978 are legendary The largest area excavation ever undertaken in
the British Isles involving around 5000 participants recorded around 44 000 archaeological features dating from the Beaker
to Anglo Saxon periods and recovered something in the region of 1 7 million finds of Mesolithic to post medieval date While
various publications have emerged over the intervening years the death of both directors insufficient funding many
organizational complications and the sheer volume of material evidence have severely delayed full publication of this
extraordinary palimpsest landscape Lives in Land is the first of two major volumes which bring together all the evidence from
Mucking presenting both the detail of many important structures and assemblages and a comprehensive synthesis of
landscape development through the ages settlement histories changing land use death and burial industry and craft activities
The long time gap since completion of the excavations has allowed the authors the unprecedented opportunity to stand back
from the density of site data and place the vast sum of Mucking evidence in the wider context of the archaeology of southern
England throughout the major periods of occupation and activity Lives in Land begins with a thorough evaluation of the
methods philosophy and archival status of the Mucking project against the organizational and funding background of its time
