Migrants Minorities Health Historical And Contemporary Studies:

Migrants, Minorities & Health Lara Marks, Michael Worboys, 2002-11-01 How has twentieth century medicine dealt with immigrants and minorities The contributors to *Migrants Minorities and Health* have studied a number of different types of migrant and minority groups from different societies around the world in order to examine the complex relations between health issues and ideas of ethnicity and race The collection explores the historical origins and the contemporary power of stereotypical views of immigrants as importers of disease for instance or of minorities as a source of infection in the host society The authors show how ideas of ethnicity and race have shaped and in turn have been influenced by the construction of medical ideas Challenging our common assumptions about migrants minorities and health this collection brings together new perspectives from a variety of disciplines It will make fascinating reading for social historians medical historians and social policy makers

Contagious Communities Roberta Bivins, 2015-09-24 It was only a coincidence that the NHS and the Empire Windrush a ship carrying 492 migrants from Britain's West Indian colonies arrived together On 22 June 1948 as the ship's passengers disembarked frantic preparations were already underway for 5 July the Appointed Day when the nation's new National Health Service would first open its doors The relationship between immigration and the NHS rapidly attained and has enduringly retained notable political and cultural significance Both the Appointed Day and the post war arrival of colonial and Commonwealth immigrants heralded transformative change Together they reshaped daily life in Britain and notions of Britishness alike Yet the reciprocal impacts of post war immigration and medicine in post war Britain have yet to be explored *Contagious Communities* casts new light on a period which is beginning to attract significant historical interest Roberta Bivins draws attention to the importance but also the limitations of medical knowledge approaches and professionals in mediating post war British responses to race ethnicity and the emergence of new and distinctive ethnic communities By presenting a wealth of newly available or previously ignored archival evidence she interrogates and re balances the political history of Britain's response to New Commonwealth immigration *Contagious Communities* uses a set of linked case studies to map the persistence of race in British culture and medicine alike the limits of belonging in a multi ethnic welfare state and the emergence of new and resolutely unimagined communities of patients researchers clinicians policy makers and citizens within the medical state and its global contact zones

The Politics of Madness Joseph Melling, Bill Forsythe, 2006-04-18 The discovery and treatment of insanity remains one of the most debated and discussed issues in social history Focusing on the second half of the nineteenth century The Politics of Madness provides a new perspective on this important topic based on research drawn from both local and national material Within a social and cultural history of the English political and class order it presents a fresh appraisal of the significance of the asylum in the decades following the creation of a national asylum system in 1845 Arguing that the new asylums provided a meeting place

for different social interests and aspirations the text asserts that this then marked a transition in provincial power relations from the landed interests to the new coalition of professional commercial and populist groups which gained control of the public asylums at the end of the period surveyed *The Hidden Affliction* Simon Szreter, 2019 Multidisciplinary collection of essays on the relationship of infertility and the historic STIs gonorrhea chlamydia and syphilis producing surprising new insights in studies from across the globe and spanning millennia *Doctors beyond Borders* Laurence Monnaï, David Wright, 2016-05-09 The transnational migration of health care practitioners has become a critical issue in global health policy and ethics *Doctors beyond Borders* provides an essential historical perspective on this international issue showing how foreign trained doctors have challenged and transformed health policy and medical practice in countries around the world Drawing on a wide variety of sources from immigration records and medical directories to oral histories the contributors study topics ranging from the influence of South Asian doctors on geriatric medicine in the United Kingdom to the Swedish reaction to the arrival of Jewish physicians fleeing Nazi Germany and the impact of the Vietnam War on the migration of doctors to Canada Combining social history the history of health and medicine and immigration history *Doctors beyond Borders* is an impressive selection of essays on a topic that continues to have global relevance **Contraception, Colonialism and Commerce** Sarah Hodges, 2017-03-02 Birth control holds an unusual place in the history of medicine Largely devoid of doctors or hospitals only relatively recently have birth control histories included tales of laboratory based therapeutic innovation Instead these histories elucidate the peculiar slippages between individual bodies and a body politic occasioned by the promotion of techniques to manipulate human reproduction The history of birth control in India brings these as well as additional complications to the field Contrary to popular belief India has one of the most long lasting institutionalized far reaching state sponsored family planning programs in the world During the inter war period the country witnessed the formation of groups dedicated to promoting the cause of birth control This book outlines the early history of birth control in India particularly the Tamil south In so doing it illuminates India's role in a global network of birth control advocacy The book also argues how Indians contraceptive advocacy and associationalism became an increasingly significant realm of action in which they staked claims not just about the utility of contraception but simultaneously over their ability and right to self rule **Worlds of Health** Kate Reed, 2003-03-30 In this era of globalization we are faced with a plethora of health goods and services on the local and global marketplace Faced with such variety and availability how do we choose This volume examines the influence of ethnicity gender and generation on our health choices focusing in particular on the choices of British Asian mothers Asian women who are born and raised in Britain but are members of a globally dispersed ethnic group Other factors such as family religion community and space are also taken into account by the author who uses original empirical research to explore the interconnections between the different factors and the ways in which these women combine western and nonwestern health discourses in their daily lives **Prostitution, Race and Politics** Philippa

Levine,2013-01-11 In addition to shouldering the blame for the increasing incidence of venereal disease among sailors and soldiers prostitutes throughout the British Empire also bore the burden of the contagious diseases ordinances that the British government passed By studying how British authorities enforced these laws in four colonial sites between the 1860s and the end of the First World War Philippa Levine reveals how myths and prejudices about the sexual practices of colonized peoples not only had a direct and often punishing effect on how the laws operated but how they also further justified the distinction between the colonizer and the colonized

The Healthy Country? Alistair Woodward,Tony Blakely,2015-01-01 Did Maori or Europeans live longer when Captain James Cook arrived in New Zealand in 1769 Why were Pakeha New Zealanders the healthiest longest lived people on the face of the globe for 80 years and why did Maori not enjoy the same life expectancy Why were New Zealanders health and longevity surpassed by other nations in the late 20th century Through lively text and quantitative analysis presented in accessible graphics the authors answer these questions by analyzing the impact of nutrition and disease immigration and unemployment alcohol and obesity and medicine and vaccination The result is a powerful argument about why people live and why people die in New Zealand and what might be done about it The Healthy Country is important reading for anyone interested in the story of New Zealanders and a decisive contribution to current international debates about health disease and medicine
