Zelizer,2012-04-12 This volume showcases the most exciting new voices in the fields of business and political history While the media frequently warns of the newfound power of business in the world of politics the authors in this book demonstrate that business has mobilized to shape public policy and government institutions as well as electoral outcomes for decades Rather than assuming that business influence is inevitable the chapters explore the complex evolution of this relationship in a wide range of different arenas from attempts to create a corporate friendly tax policy and regulations that would work in the interests of particular industries to local boosterism as a weapon against New Deal liberalism to the nexus between evangelical Christianity and the oil industry to the frustrations that business people felt in struggles with public interest groups The history that emerges show business actors organizing themselves to affect government in myriad ways sometimes successfully but other times with outcomes far different than they hoped for The result in an image of American politics that is more complex and contested than it is often thought to be The essays represent a new trend in scholarship on political economy one that seeks to break down the barriers that once separated old subfields to offer a vision of the economy as shaped by politics and political life influenced by economic

relationships     Environmental Advertising in China and the USA Xinghua Li, 2016-05-05 Since the late 1980s green consumerism has been hailed in the West as an efficient solution to environmental problems However Chinese consumers have been slow to warm up to eco friendly products Consumers prefer SUVs to hybrid cars health supplements and snake oil medicines to organic foods and eco fashion is still secluded in high end designer studios These choices contradict the findings of many sustainable lifestyle surveys that claim to register a rising desire for green products among the Chinese This book examines the psycho cultural differences that disrupt the translation of eco friendly appeals to China by analyzing environmental advertising It explores the different notions of green the structures of desire that underlies the advertisements and how they are shaped by ideological cultural and historical differences Rather than arguing the superiority of the American or Chinese version of green consumerism the book interrogates the role of advertising in the global spread of Western ideologies and explores the possibilities for consumers to resist transnational corporate hegemony in the green movement This book fills an important gap in the critical scholarship on green marketing and should be of interest to students and scholars of environment studies green advertising and marketing environmental communication and media studies China studies and environmental sociology ethics and cultural studies
