

Hey, you over there!

In this unit, we do a quick survey of the planet you live on.

Planet Earth, your home

◀ Planet Earth, seen from the moon.

You live on planet Earth.

- ◆ You are young. The Earth is very old. About 4.6 billion years old.
- ◆ It is held in space by a force between it and the sun. This force attracts objects to each other. It is called **gravity**.
- ◆ The Earth travels non-stop around the sun, taking you along too. (So while you sit here, reading this, you are on a cosmic journey.) It shoots along at 108 000 km an hour. One full orbit around the sun takes it a year.
- ◆ It spins as it goes. Here at the UK, it is spinning at about 1400 km an hour. One full spin takes a day.
- ◆ But you don't fly off as it spins – because you are held to it by gravity.

What's it like?

Your planet home is big – about 40 000 km around its middle.

It is made of rock, and, deep inside, two metals, iron and nickel.

Over two-thirds of it is covered by oceans. These are very deep in places. But compared with the size of the Earth, they are just a thin film of water.

Around the Earth is a layer of gas, that travels with it. This layer is called the **atmosphere**. It is over 100 km deep – but most of the gas lies in the lowest 30 km. We call it **air**. You breathe it in.

Did you know?

- ◆ Because the Earth spins, we get day and night.
- ◆ When your place turns away from the sun, you get night.

What if ...

- ◆ ... the Earth stopped spinning?

Geog 1 3rd Edition Answer

K Payea

Geog 1 3rd Edition Answer:

This Captivating World of Kindle Books: A Comprehensive Guide Revealing the Pros of Kindle Books: A Realm of Convenience and Flexibility Kindle books, with their inherent portability and ease of access, have liberated readers from the limitations of physical books.
