Amazing Race Marianne Berkes, 2015-09-10 A retelling of the classic story with a math twist Henry Hare was always bragging about how fast he was One day he challenges Tessie Tortoise to a mile long race up the hill Henry leaps ahead for the first eighth of a mile As Tessie approaches he bounds ahead again Fractions and distance measurements mark their progress as Tessie and Henry race to the finish line Equipping Space Cadets Emily Midkiff, 2022-04-19 Winner of the 2023 Science Fiction Research Association SFRA Book Award 2022 Longlist Nominee for the Best Non Fiction Award from the British Science Fiction Association Equipping Space Cadets Primary Science Fiction for Young Children argues for the

benefits and potential of primary science fiction or science fiction for children under twelve years old Science fiction for children is often disregarded due to common misconceptions of childhood When children are culturally portrayed as natural and simple they seem like a poor audience for the complex scientific questions brought up by the best science fiction The books and the children who read them tell another story Using three empirical studies and over 350 children s books including If I Had a Robot Dog Bugs in Space and Commander Toad in Space Equipping Space Cadets presents interdisciplinary evidence that science fiction and children are compatible after all Primary science fiction literature includes many high quality books that cleverly utilize the features of children s literature formats in order to fit large science fiction questions into small packages In the best of these books authors make science fiction questions accessible and relevant to children of various reading levels and from diverse backgrounds and identities Equipping Space Cadets does not stop with literary analysis but also presents the voices of real children and practitioners The book features three studies a survey of teachers and librarians quantitative analysis of lending records from school libraries across the United States and coded read aloud sessions with elementary school students The results reveal how children are interested in and capable of reading science fiction but it is the adults including the most well intentioned librarians and teachers who hinder children s engagement with the genre due to their own preconceptions about the genre and children

Mankind Beyond Earth Claude Piantadosi,2013-01-08 Seeking to reenergize Americans passion for the space program the value of further exploration of the Moon and the importance of human beings on the final frontier Claude A Piantadosi presents a rich history of American space exploration and its major achievements He emphasizes the importance of reclaiming national command of our manned program and continuing our unmanned space missions and he stresses the many adventures that still await us in the unfolding universe Acknowledging space exploration s

practical and financial obstacles Piantadosi challenges us to revitalize American leadership in space exploration in order to reap its scientific bounty Piantadosi explains why space exploration a captivating story of ambition invention and discovery is also increasingly difficult and why space experts always seem to disagree He argues that the future of the space program requires merging the practicalities of exploration with the constraints of human biology Space science deals with the unknown and the margin and budget for error is small Lethal near vacuum conditions deadly cosmic radiation microgravity vast distances and highly scattered resources remain immense physical problems To forge ahead America needs to develop affordable space transportation and flexible exploration strategies based in sound science Piantadosi closes with suggestions for accomplishing these goals combining his healthy skepticism as a scientist with an unshakable belief in space s untapped and wholly worthwhile potential
