by developing a framework for manipulating fine grained distinctions in word descriptions and finally by formalizing a set of mechanisms for specialized composition of aspects of such descriptions of words as they occur in context extended and novel senses are generated The subjects covered include semantics of nominals figure ground nominals relational nominals and other event nominals the semantics of causation in particular how causation is lexicalized in language including causative unaccusatives aspectual predicates experiencer predicates and modal causatives how semantic types constrain syntactic expression such as the behavior of type shifting and type coercion operations a formal treatment of event semantics with subevents and a general treatment of the problem of polysemy Language Speech and Communication series
