Mechanical Engineering, 1911 **Sorry! You are Not Employable** SHISHIR. PROF (COL) KUMAR, 2019 Prof Col Shishir Kumar with his extensive experience in the Indian Army and as the Dean/Director of DIT University Dehradun explains how there are four deliverables to Teaching: passing on Knowledge, imparting Skills, creating the right psychological construct or Attitude, and inculcating Values. The 80/20 Pareto Principle reveals how 20 percent of efforts results into 80 percent of results and vice versa. This book gives you an insight into the 20% of factors that can boost your effectiveness both in your personal and professional life. It is aimed at getting you in the mindset of inculcating other qualities in yourself that are never taught in most of the educational institutions and which are vital in getting your dream job. PROF COL SHISHIR KUMAR: Students are given knowledge but lack soft skills, problem solving capability, listening skills and communication skills which makes them unemployable. Unless this situation is improved, students will suffer from lack of gainful engagements. Therefore, there is a greater need on the part of students to change their own situation proactively. This book is aimed at making today's youth successful in all walks of life.

Standards and Standardization: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2015-02-28 Effective communication requires a common language, a truth that applies to science and mathematics as much as it does to culture and conversation. *Standards and Standardization: Concepts, Methodologies, Tools and Applications* addresses the necessity of a common system of measurement in all technical communications and endeavors in addition to the need for common rules and guidelines for regulating such enterprises. This multivolume reference will be of practical and theoretical significance to researchers, scientists, engineers, teachers and students in a wide array of disciplines.

Learning and Knowledge Management in the Firm Gabriela Dutrénit, 2000-01-01 This is a substantive contribution to the literature on capability development, one which breaks new ground on a hitherto little understood aspect of the knowledge management literature: knowledge management issues related with transition stage. Few researchers have addressed the full complexity of the transition process of capability development drawing on such an impressive set of data and over such an extended period of time. By doing so, the book provides a range of new insights into

knowledge management issues related with the process of capability development namely those related to the organizational knowledge creation within a latecomer firm It should be read and discussed Muriela P dua Journal of Evolutionary Economics Strategic management literature has until now concentrated on the analysis of how large innovative firms maintain rebuild or renew strategic capabilities This important book illustrates the complex transition process involved as firms accumulate knowledge and develop new types of knowledge management to build the primary strategic capabilities **Interview**

Technology Teachers as Researchers Inga-Britt Skogh, Marc J. De Vries, 2014-02-05. This book presents the scientific output of the TUFF research school in Sweden. In this school a group of active teachers worked together on a series of educational research studies. All of those studies were related to the teaching about technology and engineering. The research program consisted of studies at various angles of view: a philosophical view, a national view and a classroom practice view. The book is a showcase of how a well conducted research program for teachers can lead to good contributions to technology education research. A selection of topics: the nature of technological knowledge, mental images of engineers and engineering, the process of choosing for a study in technology, teachers' beliefs about technology education and assessment. These topics are directly related to major issues in the international technology education research agenda. The studies presented here were the basis of the authors' Ph.D. theses. The teachers' chapters are preceded by a description of ideas behind the TUFF research school and the way it was realized.

Knowledge and Identity Gabrielle Ivinson, Brian Davies, John Fitz, 2010-11-23. What in the digital era is knowledge? Who has knowledge and whose knowledge has value? Drawing on aspects of Bernstein's work that have attracted an international following for many years, the international contributors to this book raise questions about knowledge production and subjectivity in times dominated by market forces, privatisation and new forms of state regulation.
