Graphics ,1963 **On Line and On Paper** Kathryn Henderson,1998-12-01 The role of representation in the production of
technoscientific knowledge has become a subject of great interest in recent years In this book sociologist and art critic
Kathryn Henderson offers a new perspective on this topic by exploring the impact of computer graphic systems on the visual
culture of engineering design Henderson shows how designers use drawings both to organize work and knowledge and to
recruit and organize resources political support and power Henderson s analysis of the collective nature of knowledge in
technical design work is based on her participant observation of practices in two industrial settings In one she follows the
evolution of a turbine engine package from design to production and in the other she examines the development of an
innovative surgical tool In both cases she describes the messy realities of design practice including the mixed use of the
worlds of paper and computer graphics One of the goals of the book is to lay a practice informed groundwork for the creation
of more usable computer tools Henderson also explores the relationship between the historical development of engineering
as a profession and the standardization of engineering knowledge and then addresses the question Just what is high
technology and how does its affect the extent to which people will allow their working habits to be disrupted and
restructured Finally to help explain why visual representations are so powerful Henderson develops the concept of

metaindexicality the ability of a visual representation used interactively to combine many diverse levels of knowledge and thus to serve as a meeting ground and sometimes battleground for many types of workers Modelling and Graphics in Science and Technology Jose Teixeira, Joachim Rix, 2012-12-06 Graphics and Modelling are key technologies to support visualisation and product development tasks Based on the recent developments in the areas of scientific visualisation interaction techniques distributed systems and product design in dustrial and applied research have improved the possibilities for further approaches and issues and for exchanging experiences A workshop on Graphics and Model ling in Science Technology was held in Coimbra Portugal in June 1994 and the programme committee selected 19 papers for presentation The workshop had a good international participation Due to the extensive scientific contacts between Portuguese and German researchers the workshop included the third Luso German Computer Graphics Meeting This book reflects the results of the workshop The papers were updated after the workshop presentations to reflect the discussions during the meeting Correspond ing to the different topics addresses in the workshop the book is divided into the following six sections CAD Models and Architectures Short overviews of the Reference Architecture for CAD and the Integration Con cept for CAD applications are given in this section The integration ability of the international standard STEP is analysed as well as STEP s integration approaches for product data sharing and product data exchange Mechanical Engineering ,1962
