François Maon, Sankar Sen, 2016-04-01 The way organizations manage their value chain has changed dramatically over the past decade. Today organizations take account of economic issues but they also adopt a broader perspective of their purpose including social and environmental issues. Yet despite its global spread sustainable value chain management remains an uncertain and poorly defined ambition with few absolutes. The social and environmental issues that organizations should address easily can be interpreted as including virtually everything. Current literature on the topic seeks to understand the effects and management of initiatives dealing with diversity, human rights, safety, philanthropy, community and environment. However the penetration of social and environmental considerations into value chain management is described as desire lacking reality thereby making the idea a patchy success. The objective of this research anthology is to investigate different angles of sustainable value chain management. The book's 27 chapters fill holes and explore new fields; the chapters are organised in five sections: Sustainable value chains context, drivers and barriers; Sustainable value chains managing activities; Sustainable value chains managing networks and collaboration; Sustainable value chains integrative perspectives; and Sustainable value chains specific sectorial and industry perspectives. **De Gruyter Handbook of Coopetition** James M. Crick, 2025-05-19 While plenty of research has been undertaken on coopetition the practice of organisations of different sizes collaborating with their competitors in informal and/or formal capacities the wider business community is still learning about how and why companies join forces with their competitors as well as the benefits and drawbacks of these strategies. The De Gruyter Handbook of Coopetition is designed to showcase some novel studies about the ways that coopetition activities are managed by businesses using a variety of contexts and research methods the advantages of these strategies and insights about what can go wrong when competing firms collaborate with one another. The contributors address certain under researched issues such as how coopetition operates in internationally oriented arenas e.g. for exporters the dark side of coopetition strategies measuring the coopetition construct in empirical research methodological factors for investigating coopetition activities and much more. This handbook will benefit academics postgraduate researchers students and practitioners that are interested in the interplay between cooperation and competition. *Breaking up the Global Value Chain* Torben Pedersen, Timothy M. Devinney, Laszlo Tihanyi, Arnaldo Camuffo, 2017-08-18 Recent developments are challenging the traditional separation between advanced and emerging economies as host of knowledge and production intensive activities respectively. Authors assess whether the co location of R D and manufacturing is critical for development and innovation. **Research Handbook of International Talent Management** Yipeng Liu, 2019 International talent management has become a critically important topic for scholarly discussion in policy debates and among the business community. Despite this however research into talent management tends to lack theoretical underpinnings especially from an international multidisciplinary and comparative perspective. This Research Handbook fills this gap bringing together a range of leading researchers scholars and thinkers to debate and advance the conceptualization and understanding of this
